## SECTION II – SUMMARY OF THE ISSUE DOCUMENT

This section is a general summary of the terms of the issue, certain disclosures included in this Draft Red Herring Prospectus and is not exhaustive, nor does it purport to contain a summary of all the disclosures in this Draft Red Herring Prospectus or all details relevant to prospective investors. This summary should be read in conjunction with, and is qualified in its entirety by, the more detailed information appearing elsewhere in this Draft Red Herring Prospectus, including the sections titled **“Risk Factors”**, **“Industry Overview”**, **“Business Overview”**, **“Capital Structure”**, **“The Issue”**, **“Restated Financial statement”**, **“Objects of the Issue”** **“Our Promoters and Promoter Group”**, **“Management’s Discussions and Analysis of Financial Position and Results of Operations”**, **“Outstanding Litigation and Material Developments”** and **“Issue Procedure”** on page 33, 117, 127, 71, 55, 184, 95, 175, 191, 207 and 253, respectively.

### SUMMARY OF BUSINESS OVERVIEW

Our Company is engaged in the business of seed manufacturing, which includes the development, multiplication, processing, and supply of seeds for a variety of field crops and vegetables. The seed production process is carried out in a structured manner across multiple stages and involves the use of improved genetic seed material procured from recognised sources. Such seed material is multiplied, processed, conditioned, and handled in accordance with prescribed agronomic and processing practices to produce seeds suitable for agricultural use, including seeds supplied to farmers for crop cultivation.

(For further details, please see chapter titled **“Business Overview”** on page 127 of this Draft Red Herring Prospectus.)

### SUMMARY OF INDUSTRY IN WHICH THE COMPANY IS OPERATING

The current India seed market size stands at USD 3.82 billion in 2025 and is projected to reach USD 5.00 billion by 2030, reflecting a forecast CAGR of 5.55%. Sustained policy support, rising certified-seed penetration, and expanding climate-smart varieties continue to anchor industry resilience. Government programs such as the National Mission on High-Yielding Seeds and the Clean Plant Program are fast-tracking premium seed adoption by funding disease-free planting material hubs, demonstration plots, and village-level clusters. Row crops dominate revenue because cereals, oilseeds, and fiber crops align with food-security and import-substitution priorities, while hybrids retain farmer loyalty thanks to consistent yield premiums under erratic rainfall. Meanwhile, protected cultivation and digital traceability pilots are opening lucrative niches for specialized vegetable and high-value seed segments. Competitive intensity is low because multinational pipelines compete with regionally adapted portfolios, yet counterfeit trade and GM regulatory uncertainty exert margin pressure.

## INTERNAL RISK FACTORS

### 1. Our business is subject to seasonality and climatic conditions, which could impact demand for our products and affect our financial performance.

Our operations are closely aligned with agricultural cycles and are seasonal in nature. The demand for our seed products depends largely on factors such as monsoon patterns, sowing periods, and prevailing cropping practices. Variations in rainfall, including delayed, insufficient, or excessive rainfall, as well as adverse weather conditions, pest incidence, or other natural factors, may influence farmers' sowing decisions and reduce the demand for seeds.

Such factors are beyond the control of our Company and may lead to fluctuations in sales volumes and operating results across different periods. Consequently, our financial performance may vary from year to year, and past performance may not be indicative of future results.

### 2. Certain delays, discrepancies and Omissions have been detected in our statutory records, as well as in records related to the submission of returns to the concerned Registrar of Companies.

In the past, there have been some instances of delays, discrepancies and Omissions in our statutory records, as well as in records related to the submission of returns to the concerned Registrar of Companies which includes inadvertently filed incorrect information in the forms filed with the Registrar of Companies. While our Company has taken corrective measures such as to avoid recurrence, we have strengthened our compliance framework by engaging full time qualified company secretary, implementing monitoring systems with due date alerts, conducting periodic internal reviews, and standardising filing processes. These measures are aimed at ensuring timely and accurate compliance in future, there can be no assurance that such lapses will not occur in the future. Any such non-compliance may invite monetary penalties, additional fees or punitive action by regulatory authorities against our Company or its Directors/Officers.

These actions could adversely affect our reputation, divert management's attention, and result in financial outflows. In addition, any punitive action may impair our corporate standing and credibility with regulators, investors, banks, customers and other stakeholders. For our present shareholders, such penalties could impact returns on investment, and for prospective shareholders, they may create uncertainty regarding the robustness of our compliance framework. Consequently, such events could materially and adversely affect our business operations, financial condition, results of operations, reputation, and the interests of our shareholders.

As per relevant provisions of present Companies Act, 2013 all the respective instances that have been provided below:

\*All forms have been duly filed. Due to delays in filing certain forms, additional fees were paid; however, compliance has been completed and no penalty has been imposed.

However, it cannot be assured that even in future no such penalty will be levied. Therefore, if the authorities impose monetary penalties on us or take certain punitive actions against our Company or its Directors / Officers in relation to the same, our business, financial condition and results of operations could be adversely affected.

**3. Major portion of our transactions are conducted in cash, which may expose us to operational, regulatory, and financial risks.**

Major portion of our sales transactions are conducted in cash in the ordinary course of business, particularly in dealings with farmers, dealers, and other market participants, in line with prevailing practices in certain segments of the agricultural seed industry. Cash-based transactions inherently involve risks, including limited traceability, handling risks, and increased scrutiny from regulatory and tax authorities.

Any changes in applicable laws, regulations, or enforcement practices relating to cash transactions, or any adverse interpretation by regulatory authorities, may require the Company to alter its business practices and could have an adverse effect on its business operations, financial condition, and results of operations.

**4. Certain delays in statutory filings under the Companies Act, 2013 may lead to financial and regulatory consequences for our Company.**

Our Company was required to file certain statutory e-Forms MGT-14 with the Registrar of Companies (“RoC”) within 30 days of passing special resolutions and Board resolutions, in accordance with the provisions of Section 117 of the Companies Act, 2013. However, there were delays in filing the said forms in respect of certain corporate actions, details of which are set out below:

Sr. No.	Particulars	Form	Date of Event	Due Date of Filing	Actual Date of Filing	Delay (in days)
1	Alteration of Object Clause in Memorandum of Association	MGT-14	23/04/2024	23/05/2024	25/12/2025	581
2	Resolution passed under Section 179(3) for Private Placement Issue	MGT-14	02/04/2024	02/05/2024	31/12/2025	608
3	Resolution passed under Section 179(3) for Private Placement Issue	MGT-14	20/09/2024	20/10/2024	31/12/2025	437
4	Resolution passed under Section 179(3) for Private Placement Issue	MGT-14	18/10/2024	17/11/2024	31/12/2025	409

The aforesaid delays constituted non-compliance with Section 117 of the Companies Act, 2013 and may attract penalties on the Company and its officers in default under Section 454 of the Companies Act, 2013, as may be determined by the adjudicating authority. Although the Company has subsequently made good the delayed filings and has initiated adjudication proceedings before the Registrar of Companies to regularize the defaults, there can be no assurance regarding the outcome of such proceedings or the quantum of penalties, if any, that may be imposed.

Any adverse order passed by the adjudicating authority, including the imposition of monetary penalties, may result in financial outflows, diversion of management time, and reputational impact on the Company. Further, such non-compliances may subject the Company to increased regulatory scrutiny in the future, which could lead to higher compliance costs and operational challenges.

While the Company has taken corrective steps to strengthen its internal compliance systems, controls, and monitoring mechanisms to ensure timely statutory filings going forward, there can be no assurance that similar delays or non-

compliances will not occur in the future. Any failure to comply with applicable provisions of the Companies Act, 2013 and other regulatory requirements may adversely affect our business, financial condition, results of operations, cash flows, and reputation, and may impact investor confidence.

**5. *Non-compliance with certain procedural requirements under Section 42 of the Companies Act, 2013 relating to a private placement of equity shares may expose our Company to regulatory action, penalties, and other adverse consequences.***

Pursuant to a special resolution passed by the members of our Company at the Extra-Ordinary General Meeting held on October 18, 2024, the Company approved the issue of 5,90,400 Equity Shares on a private placement basis in accordance with the provisions of Section 42 of the Companies Act, 2013 and the rules made thereunder. The said equity shares were allotted in multiple tranches, and the Company filed the respective returns of allotment in Form PAS-3 with the Registrar of Companies within the prescribed timelines.

Further, it has been observed that, in respect of the another private placement made dated November 18, 2024, the Company received share application monies from certain shareholders prior to completion of the private placement process and before the allotment of securities, and the corresponding equity shares were subsequently allotted on December 03, 2024. During the interim period, the funds so received were kept in a separate bank account in the nature of a sweep fixed deposit account.

The receipt and retention of share application money prior to allotment of securities is not in strict compliance with the provisions of Section 42 of the Companies Act, 2013, which require that monies received under a private placement be utilised only for allotment of securities or for refund thereof, and not otherwise. Accordingly, the said instance constitutes a procedural non-compliance with the provisions of Section 42 of the Act.

Such non-compliance may expose the Company and its officers in default to regulatory action, penalties, or other consequences as may be determined by the relevant authorities. Any adverse order, penalty, or regulatory action could result in financial outflows, diversion of management time, reputational impact, and increased regulatory scrutiny. Further, there can be no assurance that similar non-compliances will not occur in the future.

Any such regulatory actions or penalties may adversely affect our business, financial condition, results of operations, cash flows, and investor confidence.

**6. *Our business is dependent on certain suppliers and loss of any one or more of them would have a material adverse effect on our business.***

The substantial portion of our purchases has been dependent upon few suppliers. For instance, our top ten suppliers accounted for 38.23%, 24.61%, 13.63% and 31.20% (approx.) of our total purchase for the three-month period ended June 30, 2025 and for the Fiscal 2025, Fiscal 2024 and Fiscal 2023, respectively. We have not entered into long term agreements with our suppliers and the success of our business is accordingly significantly dependent on us maintaining good relationships with them for regular supply of our raw material. The inability of a supplier to meet these requirements, the loss of a significant supplier, or any labour issues or work stoppages at a significant supplier could disrupt the supply of raw materials and parts to our facilities, preventing our Company from delivering to its customers, or cause returns of products.

The details of contribution of top 10 suppliers as a percentage of total purchase is given below:

(₹ In Lakhs)

Particulars	% Contribution to Purchases from operations for the Year ended			
	For the Period ended June 30, 2025	March 31, 2025	March 31, 2024	March 31, 2023
Top 1 Supplier	26.90%	13.48%	4.01%	7.24%
Top 3 Suppliers	36.11%	19.09%	7.76%	18.36%
Top 5 Suppliers	37.35%	21.75%	10.73%	23.51%
Top 10 Suppliers	38.23%	24.61%	13.63%	31.20%

**7. *A Substantial portion of our revenues has been dependent upon few customers. The loss of any one or more of our major customers would have a material adverse effect on our business, cash flows, results of operations and financial condition.***

The substantial portion of our revenues has been dependent upon few customers. For instance, our top ten customers accounted for 60.87%, 22.23%, 17.26% and 28.51% (approx.) of our revenue from operations for the three-month period ended June 30, 2025 and for the Fiscal 2025, Fiscal 2024 and Fiscal 2023, respectively. We have not entered into long term agreements with our customers and the success of our business is accordingly significantly dependent on us maintaining good relationships with them. The loss of one or more of these significant customers or a reduction in the amount of business we obtain from them could have an adverse effect on our business, results of operations, financial condition and cash flows. We cannot assure you that we will be able to maintain historic levels of business and/or negotiate and execute long term contracts on terms that are commercially viable with our significant customers or that we will be able to significantly reduce customer concentration in the future. Further, the sales volume may vary due to our customers' attempts to manage their inventory, market demand, product and supply pricing trends, change in customer preferences etc., which may result in decrease in demand or lack of commercial success of our products, which could reduce our sales and adversely affect our business, cash flows, results of operations and financial condition.

The details of contribution of top 10 customers as a percentage of total Revenue from operations is given below:

(₹ In Lakhs)

Particulars	% Contribution to Revenue from operations for the Year ended			
	For the Period ended June 30, 2025	March 31, 2025	March 31, 2024	March 31, 2023
Top 1 Customer	31.25%	13.71%	4.59%	6.45%
Top 3 Customers	49.25%	17.47%	10.40%	15.18%
Top 5 Customers	54.73%	19.15%	13.13%	19.98%
Top 10 Customers	60.87%	22.23%	17.26%	28.51%

#### **8. We have experienced negative cash flows from Operating and investing activities in the past.**

We have experienced negative cash flows in certain periods, and there can be no assurance that we will not experience negative cash flows in the future. The following table sets forth our net cash inflow/(outflow) from operating, investing, and financing activities for the periods indicated:

(₹ in Lakhs)

Particulars	June 30, 2025	March 31, 2025	March 31, 2024	March 31, 2023
Net Cash (used in)/ Generated from operating activities	(243.19)	(594.92)	28.83	42.04
Net Cash (used in)/ Generated from investing activities	(99.51)	(155.29)	(178.92)	(1.44)
Net Cash (used in)/ Generated from finance activities	(24.36)	1,116.61	118.36	(4.55)
Net increase/ (decrease)in cash and cash equivalents	(367.05)	366.40	(31.72)	36.06
Cash and Cash Equivalents at the beginning of the period	381.71	15.31	47.04	10.98
Cash and Cash Equivalents at the end of period	14.66	381.71	15.31	47.04

Negative cash flows in these periods were primarily due to increased working capital requirements, higher trade receivables, investments in inventory. Negative cash flows from investing activities were mainly due to investments in plant and machinery, processing facilities, and other capital expenditures undertaken in the ordinary course of business. While financing activities have partly supported our liquidity needs, there can be no assurance that we will not continue to experience negative cash flows in the future.

Sustained negative cash flows may restrict our ability to fund operations, meet working capital requirements, service debt, or pursue expansion plans without raising additional debt or equity financing. There can also be no assurance that adequate financing will be available to us on favourable terms or at all. Any such inability may materially and adversely affect our business, financial condition, cash flows, and results of operations.

*For further details, see “Management’s Discussion and Analysis of Financial Condition and Results of Operations — Cash Flows” on page 191 of this Draft Red Herring Prospectus.*

**9. Our Company requires significant amounts of working capital for continued growth. Our inability to meet our working capital requirements may have an adverse effect on our results of operations.**

Our business is working capital intensive, with a significant portion of our funds deployed towards inventories, trade receivables, and other current assets. As per our Restated Financial Statements, our total working capital requirements were ₹1,650.15 lakhs, ₹1,607.71 lakhs, ₹377.48 lakhs and ₹202.51 lakhs as of June 30, 2025, March 31, 2025, March 31, 2024 and March 31, 2023 respectively.

\*Internal Accruals include funds raised from Issue of shares, cash accruals for the year and short-term debt, if any.

Our working capital requirements are influenced by factors such as inventory levels maintained prior to the sowing season, credit terms extended to customers, timing of collections, and payment terms with suppliers. Any delay in collection of receivables, higher-than-anticipated inventory build-up, or reduction in customary supplier credit terms may result in increased working capital requirements.

Further, given the seasonal and crop-specific nature of our business, our Company is required to build inventory well in advance of peak selling periods. Any changes in demand patterns, climatic conditions, or market dynamics may necessitate maintaining higher inventory levels than currently anticipated, which could further increase working capital requirements.

In such circumstances, our Company may be required to arrange for additional financing to meet its working capital needs. There can be no assurance that such financing will be available on a timely basis, on commercially acceptable terms, or at all.

While our Company seeks to manage liquidity through routine monitoring of cash flows and working capital components in the ordinary course of business, there can be no assurance that such measures will be sufficient in the future. Any inability to maintain adequate working capital may adversely affect our business operations, growth prospects, financial condition, and results of operations.

**10. *Our business operations are currently concentrated in the State of Gujarat, and any adverse developments in this region could adversely affect our business and results of operations.***

Our Company presently carries on its business operations only in the State of Gujarat, and revenues is generated from this region. As a result, our business is exposed to risks specific to Gujarat, including changes in local economic conditions, agricultural activity, regulatory environment, infrastructure, market conditions, and competitive dynamics.

Any adverse developments affecting the State of Gujarat, such as unfavourable climatic conditions, changes in agricultural practices, regulatory or policy changes, or increased competition within the region, could adversely impact demand for our products, disrupt our operations, and affect our financial condition and results of operations.

Given that our operations are currently limited to a single geographic region, we may be more vulnerable to region-specific risks compared to companies with geographically diversified operations. Any inability to effectively manage such geographic concentration risks may adversely affect our business prospects, financial condition, and results of operations.

**11. *Our reliance on farmer arrangements without long-term agreements may adversely affect our seed production activities.***

Our seed production activities are undertaken through arrangements with farmers who cultivate seeds on their own agricultural land. Except for arrangements with a limited number of farmers, our Company does not generally enter into long-term or formal agreements with farmers for the use of agricultural land for seed sowing or seed multiplication activities. In certain instances, seed procurement and production activities may also be undertaken without any written agreements.

As a result, the availability of agricultural land and continued participation of farmers for seed production may be subject to uncertainties. Farmers may choose not to continue cultivation for our Company due to changes in crop preferences, market conditions, climatic factors, or other reasons beyond our control. Any such discontinuation or reduction in farmer participation, or non-availability of land during key agricultural seasons, could disrupt our seed production schedules and affect inventory availability.

In the event of production shortfalls or supply constraints arising from such uncertainties, our Company may procure seeds from farmers and the open market to meet operational requirements. However, such procurement may be subject to availability, pricing fluctuations, quality considerations, and increased competition, and there can be no assurance that adequate quantities will be available on commercially acceptable terms at all times.

Any inability to secure sufficient seed supply, whether through farmer arrangements or open-market procurement, may adversely affect our production planning, inventory levels, revenues, and results of operations.

**12. *We are highly dependent on the sale of Oil seeds and our business is exposed to risks related to product concentration, which could materially and adversely affect our business, financial condition, results of operations, and prospects.***

The sale of Oil seeds is the largest contributor towards our total revenue, and contributed 97.20%, 55.41%, 65.39% and 66.54% to our revenue from operations for the three-month period ended June 30, 2025 and in Fiscal 2025, Fiscal 2024 and Fiscal 2023, respectively. As a result, our business is exposed to risks related to product concentration. Our inability to produce sufficient quantities of our existing products in a timely manner or at all, our failure to develop new products that meet the evolving demands of our end consumers or to obtain the regulatory approvals for such products, the development of successful products by our competitors and general economic conditions. We cannot assure you that the performance of our oil seeds will continue to meet our customers' expectations. In addition, our business, financial condition, results of operations and prospects could be materially and adversely affected if one or more of these uncertainties or disruptions occur.

**13. We may not be able to protect our trademark “DHANWEL SEEDS”  and from infringement.**

Our Company owns a registered device trademark  bearing Trademark Application No. 6408321, filed on April 28, 2024, which has been registered with the Registrar of Trade Marks. While registration provides statutory protection, we cannot assure that our trademark will not be infringed, misused, or challenged by third parties in the future.

Despite having a registered trademark, unauthorised use, imitation, or misuse of identical or similar marks by third parties may occur, which could adversely affect our brand recognition, reputation, and commercial interests. Further, enforcement of trademark rights may involve significant time, cost, and management attention, and such enforcement actions may not always result in effective remedies or prevent further infringement.

Any inability to adequately protect or enforce our trademark rights, or any adverse outcome of disputes relating to our intellectual property, may have an adverse effect on our business, reputation, goodwill, and results of operations.

For details, see “**Government and Other Approvals**” beginning on page 212 of this Draft Red Herring Prospectus

**14. The Average Cost of Acquisition of Equity Shares by Our Promoters and Selling Shareholders May Be Lower Than the Issue Price**

The average cost of acquisition of Equity Shares by our Promoters may lower than the Issue Price. Accordingly, investors participating in the Issue may pay a higher price per Equity Share as compared to the price at which our Promoters originally acquired their Equity Shares.

*\*As certified by M/s. Sunit M Chhatbar & Co., Chartered Accountant, the statutory auditors of our Company pursuant to their certificate dated December 27, 2025.*

*For further details, including the average cost of acquisition of Equity Shares held by our Promoters, please refer to the section titled “**Capital Structure**” beginning on page 71 of this Draft Red Herring Prospectus.*

**15. Our insurance coverage may not be adequate to protect us against certain operating hazards and this may have a material adverse effect on our business.**

Our Company has obtained insurance coverage for certain risks associated with its operations. However, our insurance policies do not cover all potential risks that may arise in the course of our business. Certain risks associated with our operations may not be fully covered under our existing insurance policies, and such coverage may be subject to limitations, exclusions, or conditions.

There can be no assurance that the insurance coverage maintained by our Company will be adequate to cover all losses or liabilities that may be incurred, or that such insurance will continue to be available on commercially reasonable terms in the future. Further, insurance claims may be subject to deductibles, exclusions, limitations, or denial by insurers, and any insured loss may exceed the coverage available under the relevant policy.

If our Company suffers any significant uninsured loss, or if an insurance claim is not accepted or is insufficient to cover the loss incurred, our business operations, financial condition, and results of operations may be materially and adversely affected.

Our Company has the following insurance policies as on the date of filing this Draft Red Herring Prospectus.

**16. Our inability to accurately forecast demand for our products and effectively manage production and inventory could adversely affect our business and financial performance.**

Our Company markets its seed products primarily through dealers and distributors for sale to farmers. Decisions relating to seed production and inventory planning are required to be taken well in advance of the relevant sowing seasons and are based on management's assessment of expected demand.

Actual market demand may differ from such assessments due to various factors, including changes in farmer preferences, climatic conditions, crop patterns, pricing dynamics, or government policies. Any overestimation of demand may result in accumulation of excess inventory, increased storage and handling costs, or potential obsolescence. Conversely, underestimation of demand may lead to inventory shortages, delayed fulfilment of orders, and loss of sales opportunities or customer relationships.

Any inability to align production and inventory levels with actual market demand may adversely affect our business operations, financial condition, and results of operations.

**17. Weather conditions, crop diseases and pest attacks could adversely affect the production of our seed products and demand for our products.**

Our seed production activities and overall business performance are dependent on agro-climatic conditions and crop health. Variations in weather patterns, including insufficient or excessive rainfall, extreme temperatures, floods, droughts, or unseasonal climatic events, may adversely impact seed cultivation, crop yields, and farmers' sowing decisions.

In addition, the occurrence of crop diseases, pest infestations, or other biological risks may affect crop quality and seed viability, which could reduce production output or market acceptance of our products. Any such adverse conditions, whether occurring at a local or regional level, may disrupt our production schedules and could have an adverse effect on our business operations, financial condition, and results of operations.

**18. We have not commissioned an industry report for the disclosures made in the section titled 'Industry Overview'. These disclosures are based on publicly available data from the internet, which has not been independently verified by us.**

We have neither commissioned an industry report, nor sought consent from the quoted website source for the disclosures which need to be made in the section titled "**Industry Overview**" beginning on page 117 of this Draft Red Herring Prospectus. We have made disclosures in the said chapter on the basis of the relevant industry related data available online. We have not independently verified data from industry publications contained herein and although we believe these sources to be reliable, we cannot assure you that they are complete or reliable. Such data may also be produced on a different basis from comparable information compiled with regard to other countries. Therefore, discussions of matters

relating to India and its economy are subject to the caveat that the statistical and other data upon which such discussions are based have not been verified by us and may be incomplete or unreliable.

These facts and statistics included in **“Summary of Issue Document - Summary of our Industry”** and **“Industry Overview”** on pages no. 24 and 117 of this Draft Red Herring Prospectus. Due to possibly flawed or ineffective data collection methods or discrepancies between published information and market practice and other problems, the statistics herein may be inaccurate or may not be comparable to statistics produced elsewhere and should not be unduly relied upon. Further, we cannot assure you that they are stated or compiled on the same basis or with the same degree of accuracy, as the case may be, elsewhere. We cannot assure you that any assumptions made are correct or will not change and, accordingly, our position in the market may differ from that presented in this Draft Red Herring Prospectus. Further, the industry data mentioned in this Draft Red Herring Prospectus or sources from which the data has been collected are not recommendations to invest in our Company. Accordingly, investors should read the industry related disclosure in this Draft Red Herring Prospectus in this context.

**19. Changes in technology may render our current technologies obsolete or require us to make substantial investments.**

Modernization and technology up gradation is essential to reduce costs and increase the output. Our technology and machineries may become obsolete or may not be upgraded timely, hampering our operations and financial conditions and we may lose our competitive edge. Although we believe that we have installed updated technology, we shall continue to strive to keep our technology, plant and machinery in line with the latest technological standards. Further, the costs in upgrading our technology and modernizing the plant and machineries are significant which could substantially affect our finances and operations.

**20. Dependence upon transportation services for supply and transportation of our products are subject to various uncertainties and risks, and delays in delivery may result in rejection of products by customer.**

Our Company relies on third-party transportation and logistics service providers for movement of goods at various stages of its business operations. Such service providers are engaged on a need-based basis, and the Company has not entered into long-term or exclusive arrangements with any transportation or logistics providers.

The availability of transportation and logistics services in the markets in which we operate is fragmented and may be subject to disruptions due to factors such as capacity constraints, regulatory changes, labour issues, infrastructure limitations, or unforeseen events. Any delay, damage, or loss during transit may result in operational inefficiencies, customer dissatisfaction, or additional costs.

Further, the value of goods transported is typically higher than the transportation charges paid to third-party service providers, which may limit the Company's ability to recover adequate compensation in the event of loss, damage, or delay. Any disruption or inefficiency in transportation or logistics arrangements may adversely affect the Company's business operations, financial condition, and results of operations.

**21. Our continued operations are critical to our business and are subject to operating risks such as breakdown or failure of machinery, disruption to power sources or any temporary shutdown of our processing facility, in the event of which, our business, results of operations, financial condition and cash flows can be adversely affected.**

Our processing facility are subject to operating risks, such as the breakdown or failure of machinery, power supply or processes, performance below expected levels of efficiency, obsolescence of equipment or machinery, labour disputes, natural disasters, industrial accidents and the need to comply with the directives of relevant government authorities. Our customers rely significantly on the timely delivery of our products and our ability to provide an uninterrupted and timely supply of our products is critical to our business. We also require substantial electricity for our processing facility which is sourced from state electricity boards. Our customer relationships, business and financial results may be materially adversely affected by any disruption of operations of our products, including as a result of any of the factors mentioned above.

**22. There are outstanding legal matters involving our Company, Promoters, Directors and KMP. Any adverse decisions could divert management time and attention and have an adverse effect on our business, prospects, results of operations and financial condition.**

The amounts claimed in any proceedings or liabilities outstanding against our Company or Promoters or Directors or KMP have been disclosed to the extent ascertainable. If any new developments arise, such as an interest or penalty on outstanding liabilities, change in Indian law or rulings against us by appellate courts or tribunals, we may need to make provisions in our financial statements that could increase our expenses and current liabilities.

In addition to the above, we could also be adversely affected by complaints, claims or legal actions brought by persons, including before industry forums or sector-specific or other regulatory authorities in the ordinary course of business or otherwise, in relation to our business operations, our intellectual property, our branding or marketing efforts or campaigns

or our policies. We may also be subject to legal action by our employees and/or former employees in relation to alleged grievances, such as termination of employment. We cannot assure you that such complaints, claims or requests for information will not result in investigations, enquiries or legal actions by any regulatory authority or third persons against us.

**23. *We are dependent on our promoters and senior management and other key personnel, and the loss of, or our inability to attract or retain, such persons could affect our business, results of operations, financial condition and cash flows.***

Our business and future growth are significantly dependent on the experience and continued services of our Promoters, Mr. Kishankumar Gordhanbhai Meghani, Mr. Vimal Mansukhbhai Vekariya, Mr. Sudhir Mohanbhai Pipaliya and Mr. Nikul Mansukhbhai Vekariya, along with other key personnel. Their expertise, leadership, and relationships with suppliers, customers, regulators, and other stakeholders are critical to our operations. The loss of services of any such individuals could impair our ability to manage and expand our business effectively.

Our success also depends on our ability to attract and retain skilled professionals in a competitive industry. Inability to recruit or retain employees may adversely affect our operations and growth prospects. While we endeavour to build a strong talent pool and maintain robust processes, there can be no assurance that such measures will offset the adverse impact of attrition. Any loss of key personnel may materially and adversely affect our business, financial condition, results of operations, and cash flows.

For further details on the experience of our Directors and Key Managerial Personnel, please refer to the chapters titled ***“Our Management – Brief Profiles of Our Directors”*** and ***“Our Management – Key Managerial Personnel and Senior Management”*** beginning on page 158 respectively of this Draft Red Herring Prospectus.

**24. *We operate in a competitive environment with the presence of organised and unorganised players, which may adversely affect pricing, demand, and our business performance.***

The market for our products is competitive and includes the presence of both organised and unorganised participants. Competition in the industry is influenced by factors such as product quality, pricing, distribution reach, availability, and delivery timelines. Certain competitors may have longer operating histories, larger scale of operations, or greater financial, technical, or operational resources, which may enable them to respond more effectively to market conditions.

In addition, participants in the unorganised segment may offer products at comparatively lower prices, which may exert pressure on pricing and margins and affect our ability to compete effectively in certain markets. Increased competitive intensity may impact sales volumes, pricing realisation, and profitability.

Further, the industry has witnessed consolidation among market participants. Any consolidation among competitors or their customers or suppliers could strengthen their market position and may adversely affect our competitive standing. If we are unable to compete effectively or adapt to changing competitive dynamics, our business operations, financial condition, and results of operations may be adversely affected.

**25. *We have in the past entered into related party transactions and may continue to do so in the future, which may potentially involve conflicts of interest.***

In the ordinary course of our business, we enter into and will continue to enter into transactions with related parties with our Promoters, Directors, Key Managerial Personnel, Promoter Group. While we believe that all such transactions have been conducted on an arm's length basis, we cannot assure you that we might have obtained more favourable terms had such transactions been entered into with unrelated parties.

While we will conduct all related party transactions post listing of the Equity Shares subject to the Board's or Audit Committee's or Shareholders' approval, as applicable, and in compliance with the provisions of Companies Act, 2013, as amended, provisions of the SEBI Listing Regulations and other applicable law, such related party transactions may potentially involve conflicts of interest, which may be detrimental to our Company and may have an adverse impact on our Company, and which our Company will endeavour to duly address as and when they may arise. However, we cannot assure you that any such future transactions, individually or in the aggregate, may not involve potential conflicts of interest which will not have an adverse effect on our business, results of operations, financial condition and cash flows.

Our related party transactions for the Period ended June 30, 2025 and for the Financial Year ended March 31, 2025, 2024 and 2023 which included loans received, loan repayments and other transactions. For details on our related party transactions for the Financial Year ended March 31, 2025, 2024 and 2023 see ***“Restated Financial Statement -Related***

**Party Transactions**" on page 184 under the chapter titled "**Restated Financial Statement**" on page 184 of this Draft Red Herring Prospectus.

**Note-All related party transactions are carried out at Arm's Length Price (ALP). Further, list of the related parties and all related party transactions, are disclosure under AS 18 and / or as covered under section 188(2) of the Companies Act, 2013 (as amended), SEBI (LODR) Regulations and other statutory compliances. However, there have been no conflicts of interest among our equity shareholders in relation to the related party transactions entered into in the past.**

**26. We have taken guarantees from Promoters/Directors in relation to debt facilities provided to us. Our reliance on guarantees provided by Promoters/Directors for secured debt facilities exposes us to financing and liquidity risks in case of their withdrawal.**

We have availed secured debt facilities from our bankers that are backed by guarantees provided by our Promoters/Directors. In the event that any of these guarantees are withdrawn or terminated, our lenders may require us to arrange for alternate guarantees, repay the outstanding amounts under such facilities, or may even terminate such facilities.

There can be no assurance that we will be able to arrange alternate guarantees or financing on commercially acceptable terms or within the required time. Any inability to arrange substitute guarantees or repay such borrowings could adversely affect our financial condition, liquidity position, and operations. For further details, please refer to the chapter titled "**Statement of Financial Indebtedness**" and "**Restated Financial Statement**" on page 188 and 184 of this Draft Red Herring Prospectus.

**27. None of our directors have prior experience serving as directors in any other listed company in India.**

While our Board members bring significant expertise in their respective fields, none of them have prior experience serving as directors in any other listed company in India. This lack of experience may present challenges in aligning with the best practices of corporate governance and effectively implementing these norms. Additionally, this could influence the company's credibility and reputation among investors and other key stakeholders. For further details, please refer to the chapter titled "**Our Management**" on page 158 of the Draft Red Herring Prospectus.

**28. We could be harmed by employee misconduct or errors that are difficult to detect and any such incidences could adversely affect our financial condition, results of operations and reputation.**

Employee misconduct or errors could expose us to business risks or losses, including regulatory sanctions and serious harm to our reputation. There can be no assurance that we will be able to detect or deter such misconduct. Moreover, the precautions we take to prevent and detect such activity may not be effective in all cases. Our employees may also commit errors that could subject us to claims and proceedings for alleged negligence, as well as regulatory actions on account of which our business, financial condition, results of operations and goodwill could be adversely affected.

**29. We may be subject to unionization, strikes, work stoppage or increased labour costs, which could adversely affect our business and results of operations.**

Our Company's operations require the availability of workforce across various activities. While our business is not dependent on a large permanent workforce, we engage employees, and daily wage labour based on operational requirements. Our ability to operate efficiently depends on maintaining adequate workforce availability and harmonious relations with such personnel.

Although we have not experienced any material labour disputes, strikes, lockouts, or work stoppages in the past, we cannot assure that such events will not occur in the future. Any labour-related disruption, including disputes, absenteeism, work stoppages, or industrial incidents, may interrupt operations and affect productivity.

Further, changes in labour laws, regulatory requirements, or increased costs associated with hiring, retaining, or complying with labour-related obligations may result in additional expenses. Any prolonged disruption in workforce availability or increase in labour-related costs could adversely affect our business operations, financial condition, and results of operations.

For further details regarding our workforce, please refer to the section titled “**Business Overview – Human Resources**” in this Draft Red Herring Prospectus.

**30. Our indebtedness, including various conditions and restrictive covenants imposed on us under our financing agreements and could adversely affect our ability to grow our business or react to changes in our business environment.**

As of June 30, 2025, we had total outstanding financial indebtedness of ₹ 581.16 Lakhs, comprising both long-term and short-term borrowings. Our financing agreements contain certain conditions and restrictive covenants, which vary depending on the requirements of the lenders and the terms negotiated in each facility. These covenants may restrict or delay certain actions or initiatives that we may propose to undertake, including incurring additional indebtedness, making investments, creating security over assets, or undertaking corporate restructuring. Failure to comply with such covenants or to obtain necessary consents could adversely impact our business operations and financial flexibility.

While we have received all relevant consents required for the purposes of this Issue and have complied with applicable covenants, there can be no assurance that we will continue to remain compliant in the future. Although we have not defaulted on any covenants during the past three financial years, any failure to comply with the terms of our financing agreements could result in the lenders declaring an event of default, accelerating repayment obligations, or enforcing security. Further, a default under one agreement may also trigger cross-default provisions in other agreements, which could, individually or in the aggregate, materially and adversely affect our financial condition and operations.

In addition, a portion of our borrowings are subject to variable interest rates, which are linked to benchmark rates such as MCLR or other base rates determined by the RBI, along with a contractually agreed spread. Any increase in interest rates, adverse changes in our credit rating, or tightening of monetary policy by the Government of India could increase our cost of borrowing. Rising interest costs or restrictions on our ability to raise additional capital may materially and adversely impact our business, results of operations, cash flows, and financial condition.

For further details regarding our borrowings, please refer to the chapter titled “**Statement of Financial Indebtedness**” on 188 of this Draft Red Herring Prospectus.

**31. We require certain approvals and licenses in the ordinary course of business and are required to comply with certain rules and regulations to operate our business, and the failure to obtain, retain, and renew such approvals and licenses in timely manner or comply with such rules and regulations or at all may affect our operations.**

We require several statutory and regulatory permits, licenses, and approvals to operate our business. We need to ensure compliance and complete necessary applications at appropriate stages of our business to continue our operations. There is no assurance that the relevant authorities will issue or renew these approvals or licenses in a timely manner, or at all. Any failure by our Company to comply with these requirements may result in the cancellation of such licenses, approvals, or registrations, which could adversely affect our operations and financial strength.

Further, many of our approvals are granted for fixed periods of time and need renewal from time to time. Although there have been no past instances of such adverse regulatory action on our Company in this regard, non-renewal of the said permits and licenses would adversely affect our Company’s operations, thereby having a material adverse effect on our business, results of operations and financial condition. For further details, please see chapters titled “**Key Industry and Regulations**” and “**Government and Other Approvals**” at the beginning of page 142 and 212 respectively of the Draft Red Herring Prospectus.

**32. Our Promoters and the Promoter Group will jointly continue to retain majority shareholding in our Company after the Issue, which will allow them to determine the outcome of the matters requiring the approval of shareholders.**

Post this Issue, our Promoters and Promoter Group will collectively own majority of our equity share capital. As a result, our Promoter, together with the members of the Promoter Group, will continue to exercise a significant degree of influence over Company and will be able to control the outcome of any proposal that can be approved by a majority shareholder vote, including, the election of members to our Board, in accordance with the Companies Act, 2013 and our Articles of Association. Such a concentration of ownership may also have the effect of delaying, preventing or deterring a change in control of our Company.

Additionally, our Promoters will continue to have the ability to cause us to take actions that are not in, or may conflict with, our interests or the interests of some or all of our creditors or other shareholders, and we cannot assure you that such actions will not have an adverse effect on our future financial performance or the price of our Equity Shares.

For further details on the shareholding of our promoter and promoter group, please refer to the chapters titled “***Capital Structure – Following is the details of the aggregate shareholding of Our Promoter and Promoter Group before and after the Issue is set forth below***” beginning on page 71 of this Draft Red Herring Prospectus.

**33. Some of our Directors (including our Promoters) and Key Management Personnel are interested in our Company to the extent of their shareholding and dividend entitlement in our Company, in addition to normal remuneration, other benefits and reimbursement of expenses.**

Some of our Directors (including our Promoters), Key Managerial Personnel are interested in our Company to the extent of their respective shareholding and dividend entitlements, in addition to the remuneration, benefits, and reimbursement of expenses payable to them in accordance with applicable laws. As a result, they may exercise significant influence over matters requiring shareholder or Board approval, including decisions relating to the composition of our Board of Directors and matters requiring simple or special majority voting. Such interests may give rise to potential conflicts with those of our other shareholders, and there can be no assurance that such conflicts, if they arise, will be resolved in a manner favourable to our Company. Any such circumstances could adversely affect our business, financial condition, and results of operations.

For further details, please refer to the chapters titled “***Our Management***” beginning on page 158 of this Draft Red Herring Prospectus.

**34. The schedule of our estimated deployment of Net Proceeds is subject to inherent uncertainties.**

The fund requirement and deployment are based on internal management estimates and our Company’s current business plan and are subject to change in light of changes in external circumstances or costs, other financial conditions, business, or strategy. These estimates have not been appraised by any bank or financial institution. In view of the dynamic nature of the sector and specifically that of our business, we may have to revise our expenditure and fund requirements as a result of variations in cost estimates, exchange rate fluctuations, and external factors that may not be within the control of our management. This may entail rescheduling and revising the planned expenditures and fund requirements and increasing or decreasing expenditures for a particular purpose at the discretion of our management, within the objects.

For further details, refer to “***Objects of the Issue***” beginning on page 95 in this Draft Red Herring Prospectus.

**35. The objects of the Issue have not been appraised by any bank or financial institution and we cannot assure you that the objects of the Issue will be achieved within the expected time frame, or at all, and any variation in the utilisation of the Net Proceeds would be subject to certain compliance requirements, including prior shareholders’ approval.**

We intend to utilise the Net Proceeds of the Issue for the purposes set out in the section titled “***Objects of the Issue***” beginning on page 95 of this Draft Red Herring Prospectus, which include (a) Funding towards Repayment or prepayment, in full or in part, of borrowings availed by our Company from banks and financial institutions, (b) Funding the working capital requirements of our Company and (c) general corporate purpose. Our funding requirements and the proposed deployment of the Net Proceeds are based on management estimates, prevailing conditions, and internal assessments of our business requirements.

These estimates have not been appraised by any bank or financial institution and may be subject to change depending on external factors, market dynamics, costs, and strategic considerations.

Consequently, our actual requirements may differ from those envisaged, which may require us to reschedule or reallocate the deployment of funds. In case of an increase in project costs or a shortfall in funds, we may be required to meet such requirements through internal accruals, additional debt or equity financing, the availability and terms of which cannot be assured. Any such variations may adversely affect our business, results of operations, financial condition, and cash flows.

Further, pursuant to Section 27 of the Companies Act, 2013, any variation in the Objects of the Issue requires the approval of shareholders by way of a special resolution, and dissenting shareholders will be provided an exit opportunity by our Promoters or controlling shareholders in accordance with applicable law. Accordingly, investors in the Equity Shares will be relying on the judgment of our management regarding the deployment of the Net Proceeds, and there can be no assurance that such deployment will be beneficial to our Company.

**36. We have not declared any dividends till Financial Year 2024-25 and we cannot assure you that we will be able to pay dividends on our Equity Shares in the future.**

We have not declared dividends on our Equity Shares for the period since incorporation till Financial Year 2024-25. Our future ability to pay dividends will depend on various factors, including our earnings, financial health, cash flows, and working capital needs. We cannot guarantee that we will generate sufficient income to cover operating expenses and distribute dividends to shareholders. Our dividend policy will also be influenced by our expansion plans and future capital requirements. There is a possibility that we may retain all future earnings for business growth, resulting in no dividends being declared in the near or medium term. Any future decision to declare and pay dividends will be at the discretion of our Board, taking into consideration our financial condition, business prospects, cash needs, and other factors. As a result, realisation of gains on shareholder's investments may largely depend on the appreciation of the price of our Equity Shares, though there is no assurance that our shares will appreciate in value. For more information on our dividend history, please refer to the section titled "**Dividend Policy**" on page 183 of this Draft Red Herring Prospectus.

**37. Any variation in the utilisation of the Net Proceeds would be subject to certain compliance requirements, including prior shareholders' approval.**

Our Company intends to use Net Proceeds raised pursuant to the Fresh Issue in the manner set out in the section titled "**Objects of the Issue**" on page 95 of this Draft Red Herring Prospectus. In accordance with Section 27 of the Companies Act, 2013, we cannot undertake any variation in the utilisation of the Net Proceeds as disclosed in this Draft Red Herring Prospectus without obtaining the approval of shareholders of our Company through a special resolution. In the event of any such circumstances that require us to undertake variation in the disclosed utilisation of the Net Proceeds, we may not be able to obtain the approval of the shareholders of our Company in a timely manner, or at all. Any delay or inability in obtaining such approval of the shareholders of our Company may adversely affect our business or operations. Further, pursuant to Section 27 of the Companies Act, 2013, any variation in the Objects of the Issue requires the approval of shareholders by way of a special resolution, and dissenting shareholders will be provided an exit opportunity by our Promoters or controlling shareholders in accordance with applicable law.

In light of these factors, we may not be able to undertake variation of Objects of the Issue to use any unutilized proceeds of the Issue, if any, even if such variation is in the interest of our Company. This may restrict our Company's ability to respond to any change in our business or financial condition by re-deploying the unutilized portion of Net Proceeds, if any, which may adversely affect our business and results of operations.

**38. A Portion of the Net Proceeds is Proposed to be Utilized for General Corporate Purposes, the Exact Deployment of Which is at the Discretion of Our Management.**

A portion of the Net Proceeds of the Issue, constituting [●] % of the total Issue Proceeds, is proposed to be utilized for general corporate purposes, as permitted under applicable laws. The deployment of funds under this head is not subject to any specific appraisal and will be at the discretion of our management, in accordance with the policies of our Board and applicable law. We cannot assure you that the proceeds earmarked for general corporate purposes will be applied in a manner that results in an increase in the value of your investment or improves our financial condition. Any ineffective utilisation of such funds may adversely affect our business, results of operations, and financial condition.

**39. There are restrictions on daily, weekly and monthly price movement of the equity shares, which may adversely affect the shareholder's ability to sell their shares at desired price at a particular point in time.**

Once our Equity Shares are listed, we would be subject to circuit breakers imposed by the stock exchange, which restrict transactions beyond specified increases or decreases in the price of the Equity Shares. This circuit breaker operates independently of the broader index- based market-wide circuit breakers generally imposed by SEBI. The stock exchange sets the percentage limits on these circuit breakers based on the historical volatility of our Equity Shares' price and trading volume. However, the stock exchange does not disclose the current percentage limit of the circuit breaker and may change it without notice. Consequently, these limits can restrict both upward and downward price movements. As a result, we cannot guarantee your ability to sell your Equity Shares or the price you may obtain for them at any given time.

**40. We cannot assure you that our equity shares will be listed on the SME platform of BSE in a timely manner or at all, which may restrict your ability to dispose of the equity shares.**

Though we shall make best of our efforts to comply with all applicable regulatory, financial and operational requirements for getting the equity shares proposed to be offered through this Draft Red Herring Prospectus listed on SME platform of BSE in a time bound manner, yet on account of any change in applicable laws, economic conditions and/or any other reason/s beyond our control, the said shares may not get listed on the SME platform of BSE Limited in a timely manner or at all, which may restrict your ability to dispose of the equity shares. However, even in such circumstances, the company shall stay fully committed to pay such interest and/or refund the full application amount, as may be required in accordance with the applicable regulatory directives.

**41. *The requirements of being a public listed company may strain our resources and impose additional obligations.***

As a publicly listed company, we will face increased scrutiny from shareholders, regulators, and the public, leading to higher legal, accounting, and corporate governance expenses. Compliance with listing requirements, including filing unaudited financial results on a half-yearly basis, will demand significant resources and oversight from management. This additional burden may divert management's focus from other business activities, potentially affecting our overall performance. There is no assurance that we will consistently meet our reporting obligations or promptly determine and report changes to our operations like other listed companies. Furthermore, we may need to expand our management team and hire additional staff with public company experience, which may not be feasible within the required timeframe. Failure to do so could negatively affect our profits and reputation.

**42. *Pursuant to listing of the Equity Shares, we may be subject to pre-emptive surveillance measures like Additional Surveillance Measure (ASM) and Graded Surveillance Measures (GSM) by the Stock Exchanges in order to enhance market integrity and safeguard the interest of investors.***

On listing, we may be subject to general market conditions which may include significant price and volume fluctuations. The price of our Equity Shares may also fluctuate after the Issue due to several factors such as volatility in the Indian and global securities market, our profitability and performance, performance of our competitors, changes in the estimates of our performance or any other political or economic factor. The occurrence of any of the abovementioned factors may lead to us triggering the parameters listed by SEBI and the Stock Exchanges for placing securities under the GSM or ASM frameworks such as net worth and net fixed assets of securities, high low variation in securities, client concentration and close to close price variation. In the event our Equity Shares are covered under such surveillance measures implemented by SEBI and the Stock Exchanges, we may be subject to certain additional restrictions in relation to trading of our Equity Shares such as limiting trading frequency (for example, trading either allowed once in a week or a month) or freezing of price on upper side of trading which may have an adverse effect on the market price of our Equity Shares or may in general cause disruptions in the development of an active trading market for our Equity Shares.

**43. *After this Issue, the price of the Equity Shares may be subject to change, or an active trading market for the Equity Shares may not develop.***

The price of the Equity Shares on the Stock Exchange may fluctuate as a result of the factors, including:

- Volatility in the Indian and global capital market;
- Company's results of operations and financial performance;
- Performance of Company's competitors,
- Media reports on Company or pertaining to our Industry;
- Changes in our estimates of performance or recommendations by financial analysts;
- Significant developments in India's economic and fiscal policies; and
- Significant developments in India's environmental regulations.

Current valuations may not be sustainable in the future and may also not be reflective of future valuations for our industry and our Company. There can be no assurance that an active trading market for the Equity Shares will develop or be sustained after this Issue or that the price at which the Equity Shares are initially traded will correspond to the price at which the Equity Shares will trade in the market subsequent to this Issue.

**44. *QIBs and Non-Institutional Investors are not permitted to withdraw or lower their Bids (in terms of quantity of Equity Shares or the Bid Amount) at any stage after submitting a Bid, and Individual investor who applies for minimum application size are not permitted to withdraw their Bids after Bid/Issue Closing Date.***

Pursuant to the SEBI ICDR Regulations, QIBs and Non-Institutional Investors are required to pay the Bid Amount on submission of the Bid and are not permitted to withdraw or lower their Bids (in terms of quantity of Equity Shares or the Bid Amount) at any stage after submitting a Bid. Individual investor who applies for minimum application size can revise their Bids during the Bid/Issue Period and withdraw their Bids until Bid/Issue Closing Date. While our Company is required to complete all necessary formalities for listing and commencement of trading of the Equity Shares on the Stock Exchanges within Six Working Days from the Bid/Issue Closing Date, events affecting the Bidders' decision to invest in the Equity Shares, including material adverse changes in international or national monetary policy, financial, political or economic conditions, our business, results of operations or financial condition may arise between the date of submission of the Bid and Allotment. Our Company may complete the Allotment of the Equity Shares even if such events occur, and

such events limit the Bidders' ability to sell the Equity Shares Allotted pursuant to the Issue or cause the trading price of the Equity Shares to decline on listing.

**45. *There are restrictions on daily movements in the trading price of the Equity Shares, which may adversely affect a shareholder's ability to sell Equity Shares or the price at which Equity Shares can be sold at a particular point in time.***

Our listed Equity Shares will be subject to a daily "circuit breaker" imposed on listed companies by the Stock Exchanges, which does not allow transactions beyond certain volatility in the trading price of the Equity Shares. This circuit breaker operates independently of the index-based market-wide circuit breakers generally imposed by SEBI on Indian stock exchanges. The percentage limit on the Equity Shares' circuit breaker will be set by the Stock Exchanges based on historical volatility in the price and trading volume of the Equity Shares. The Stock Exchanges are not required to inform our Company of the percentage limit of the circuit breaker, and they may change the limit without our knowledge. This circuit breaker would effectively limit the upward and downward movements in the trading price of the Equity Shares. As a result of this circuit breaker, there can be no assurance regarding the ability of shareholders to sell Equity Shares or the price at which shareholders may be able to sell their Equity Shares.

**46. *The Issue price of our Equity Shares may not be indicative of the market price of our Equity Shares after the Issue and the market price of our Equity Shares may decline below the issue price and you may not be able to sell your Equity Shares at or above the Issue Price.***

The Issue Price of our Equity Shares has been determined by book building method. This price is based on numerous factors (For further information, refer the chapter titled "**Basis of Issue Price**" on page 106 of this Draft Red Herring Prospectus) and may not be indicative of the market price of our Equity Shares after the Issue. The market price of our Equity Shares could be subject to significant fluctuations after the Issue, and may decline below the Issue Price. Among the factors that affect our share price including but not limited to the following:

- Half yearly variations in the rate of growth of our financial indicators, such as earnings per share, net income and revenues;
- Changes in revenue or earnings estimates or publication of research reports by analysts;
- Speculation in the press or investment community;
- General market conditions; and
- Domestic and international economic, legal and regulatory factors unrelated to our performance.

## **EXTERNAL RISK FACTORS**

**1. *Changes in government regulations or their implementation could disrupt our operations and adversely affect our business and results of operations.***

Our business and industry are regulated by different laws, rules and regulations framed by the Central and State Government. These regulations can be amended/ changed on a short notice at the discretion of the Government. If we fail to comply with all applicable regulations or if the regulations governing our business or their implementation change adversely, we may incur increased costs or be subject to penalties, which could disrupt our operations and adversely affect our business and results of operations.

**2. *The price of our Equity Shares may be volatile, or an active trading market for our Equity Shares may not develop.***

Prior to this Issue, there has been no public market for our Equity Shares. Our Company and the Book Running Lead Manager has appointed [●] as Designated Market Maker for the equity shares of our Company. However, the trading price of our Equity Shares may fluctuate after this Issue due to a variety of factors, including our results of operations and the performance of our business, competitive conditions, general economic, political and social factors, the performance of the Indian and global economy and significant developments in India's fiscal regime, volatility in the Indian and global securities market, performance of our competitors, the Indian Capital Markets and Finance industry, changes in the estimates of our performance or recommendations by financial analysts and announcements by us or others regarding contracts, acquisitions, strategic partnership, joint ventures, or capital commitments.

**3. *You will not be able to sell immediately on Indian Stock Exchanges any of the Equity Shares you purchase in the Issue until the Issue receives appropriate trading permissions.***

The Equity Shares will be listed on the Stock Exchange. Pursuant to Indian regulations, certain actions must be completed before the Equity Shares can be listed and trading on stock exchange. We cannot assure you that the Equity Shares will be

credited to investor's demat accounts, or that trading in the Equity Shares will commence, within the time periods specified in this Draft Red Herring Prospectus. Any failure or delay in obtaining the approval would restrict your ability to dispose of the Equity Shares. In accordance with section 40 of the Companies Act, if the permission of listing the Equity Shares is denied by the stock exchanges, we are required to refund all monies collected to investors.

**4. *We are subject to risks arising from interest rate fluctuations, which could adversely impact our business, financial condition and operating results.***

Changes in interest rates could significantly affect our financial condition and results of operations. If the interest rates for future borrowings increase significantly, our cost of servicing such debt will increase. This may negatively impact our results of operations, planned capital expenditures and cash flows.

**5. *Taxes and other levies imposed by the Government of India or other State Governments, as well as other financial policies and regulations, may have a material adverse impact on our business, financial condition and results of operations.***

Taxes and other levies imposed by the Central or State Governments in India that impact our industry include customs duties, excise duties, sales tax, income tax and other taxes, duties or surcharges introduced on a permanent or temporary basis from time to time. There can be no assurance that these tax rates/slab will continue in the future. Further, with the Introduction of the Goods and Services Act, tax rates and its implication may have material impact on our services. Any changes in these tax rates/slabs could adversely affect our financial condition and results of operations.

**6. *Foreign investors are subject to foreign investment restrictions under Indian law that limits our ability to attract foreign investors, which may adversely impact the market price of the Equity Shares.***

Under the foreign exchange regulations currently in force in India, transfer of shares between non-residents and residents are freely permitted (subject to certain exceptions) if they comply with the pricing guidelines and reporting requirements specified by the RBI. If the transfer of shares, which are sought to be transferred, is not in compliance with such pricing guidelines or reporting requirements or fall under any of the exceptions referred to above, then the prior approval of the RBI will be required. Additionally, shareholders who seek to convert the Rupee proceeds from a sale of shares in India into foreign currency and repatriate that foreign currency from India will require a no objection/tax clearance certificate from the income tax authority. There can be no assurance that any approval required from the RBI or any other government agency can be obtained on any particular terms or at all.

**7. *Global economic, political and social conditions may harm our ability to do business, increase our costs and negatively affect our stock price.***

Global economic and political factors that are beyond our control, influence forecasts and directly affect performance. These factors include interest rates, rates of economic growth, fiscal and monetary policies of governments, change in regulatory framework, inflation, deflation, foreign exchange fluctuations, consumer credit availability, consumer debt levels, unemployment trends, terrorist threats and activities, worldwide military and domestic disturbances and conflicts, and other matters that influence consumer confidence, spending and tourism.

**8. *Civil disturbances, extremities of weather, regional conflicts and other political instability may have adverse effects on our operations and financial performance.***

Certain events that are beyond our control such as earthquake, fire, floods and similar natural calamities may cause interruption in the business undertaken by us. Our operations and financial results and the market price and liquidity of our equity shares may be affected by changes in Indian Government policy or taxation or social, ethnic, political, economic or other adverse developments in or affecting India.

**9. *Terrorist attacks, civil unrests and other acts of violence or war involving India or other countries could adversely affect the financial markets, our business, financial condition and the price of our Equity Shares.***

Any major hostilities involving India or other acts of violence, including civil unrest or similar events that are beyond our control, could have a material adverse effect on India's economy and our business. Incidents such as the terrorist attacks in India, other incidents such as those in US, Indonesia, Madrid and London, and other acts of violence may adversely affect the Indian stock markets where our Equity Shares will trade. Such acts could negatively impact business sentiment as well as trade between countries, which could adversely affect our Company's business and profitability. Additionally, such events could have a material adverse effect on the market for securities of Indian companies, including the Equity

Shares.

**10. *Malpractices by some players in the industry affect overall performance of emerging Companies.***

The industry in which our Company operates is subject to risk associated with unethical business practices such as unethical marketing, dishonest advertising, questionable pricing practices, inaccurate claims with regards to safety and efficacy of the product etc. Consumers' attitude toward the industry today is dominated by a sense of mistrust, paving a way for regulators for stricter entry barriers and introduction of code of conducts; making the entire industry environment regulated and controlled. Malpractices by some players in the industry affects the overall performance of the emerging Companies like us as the industry norms are applicable to all at parity. Any unethical business practices by any industry player or intermediary may impact our business and results of operations.

**11. *If certain labour laws become applicable to us, our profitability may be adversely affected.***

India has stringent labour legislations that protect the interests of workers including legislation that set forth detailed procedures for dispute resolution and employee removal legislation that imposes certain financial obligations on employers and upon retrenchment. Any changes or modifications in the existing labour laws may affect our flexibility in formulating labour related policies.

**12. *Significant differences exist between Indian GAAP, IND AS and other accounting principles, such as U.S. GAAP and IFRS, which may be material to the Financial Information prepared and presented in accordance with SEBI ICDR Regulations contained in this Draft Red Herring Prospectus.***

As stated in the reports of the Auditor included in this Draft Red Herring Prospectus under section titled "**Restated Financial Statement**" on page 184 of this Draft Red Herring Prospectus are based on financial information that is based on the audited financial statements that are prepared and presented in conformity with Indian GAAP and restated in accordance with the SEBI ICDR Regulations, and no attempt has been made to reconcile any of the information given in this Draft Red Herring Prospectus to any other principles or to base it on any other standards. Indian GAAP differs from accounting principles and auditing standards with which prospective investors may be familiar in other countries, such as U.S. GAAP and IFRS. Significant differences exist between Indian GAAP, IND AS and U.S. GAAP and IFRS, which may be material to the financial information prepared and presented in accordance with Indian GAAP contained in this Draft Red Herring Prospectus. Accordingly, the degree to which the financial information included in this Draft Red Herring Prospectus will provide meaningful information is dependent on familiarity with Indian GAAP, the Companies Act and the SEBI ICDR Regulations. Any reliance by persons not familiar with Indian GAAP on the financial disclosures presented in this Draft Red Herring Prospectus should accordingly be limited.

**13. *Instability in financial market could materially and adversely affect our results of operations and financial condition.***

The Indian economy and financial markets are significantly influenced by worldwide economic, financial and market conditions. Any financial turmoil, especially in the United States of America or Europe, may have a negative impact on the Indian economy. Although economic conditions differ in each country, investors' reactions to any significant developments in one country can have adverse effects on the financial and market conditions in other countries. A loss in investor confidence in the financial systems, particularly in other emerging markets, may cause increased volatility in Indian financial markets. Indian financial markets have also in the past experienced the contagion effect of the global financial turmoil, evident from the sharp decline in the benchmark index. Any prolonged financial crisis may have an adverse impact on the Indian economy and us, thereby resulting in a material and adverse effect on our business, operations, financial condition, profitability and price of our Equity Shares.

**14. *The extent and reliability of Indian infrastructure could adversely affect our Company's results of operations and financial condition.***

India's physical infrastructure is in developing phase compared to that of many developed nations. Any congestion or disruption in its port, rail and road networks, electricity grid, communication systems or any other public facility could disrupt our Company's normal business activity. Any deterioration of India's physical infrastructure would harm the national economy, disrupt the transportation of goods and supplies, and add costs to doing business in India. These problems could interrupt our Company's business operations, which could have an adverse effect on its results of operations and financial condition.

**15. *A slowdown in economic growth in India could cause our business to suffer.***

We are incorporated in India, and all of our assets and employees are located in India. As a result, we are highly dependent on prevailing economic conditions in India and our results of operations are significantly affected by factors influencing the Indian economy. A slowdown in the Indian economy could adversely affect our business, including our ability to grow our assets, the quality of our assets, and our ability to implement our strategy.

Factors that may adversely affect the Indian economy, and hence our results of operations, may include:

- i. any increase in Indian interest rates or inflation;
- ii. any scarcity of credit or other financing in India;
- iii. prevailing income conditions among Indian consumers and Indian corporations;
- iv. changes in India's tax, trade, fiscal or monetary policies;
- v. political instability, terrorism or military conflict in India or in countries in the region or globally, including in India's various neighbouring countries;
- vi. prevailing regional or global economic conditions; and
- vii. other significant regulatory or economic developments in or affecting India

Any slowdown in the Indian economy or in the growth of the sectors we participate in or future volatility in global commodity prices could adversely affect our borrowers and contractual counterparties. This in turn could adversely affect our business and financial performance and the price of our Equity Shares.

#### **Illustration of the Book Building and Price Discovery Process:**

Bidders should note that this example is solely for illustrative purposes and is not specific to the Issue; it also excludes Bidding by Anchor Investors. Bidders can bid at any price within the Price Band. For instance, assume a Price Band of ₹20 to ₹24.00 per share, Issue size of 3,000 Equity Shares and receipt of five Bids from Bidders, details of which are shown in

the table below. The illustrative book given below shows the demand for the Equity Shares of the Issuer at various prices and is collated from Bids received from various investors.

Bid Quantity	Amount (₹)	Cumulative Quantity	Subscription
500	24.00	500	16.67%
1000	23.00	1500	50.00%
1500	22.00	3000	100.00%
2000	21.00	5000	166.67%
2500	20.00	7500	250.00%

The price discovery is a function of demand at various prices. The highest price at which the Issuer is able to Issue the 250.00% desired number of Equity Shares is the price at which the book cuts off, i.e., ₹22 in the above example. The Issuer, in consultation with the Book Running Lead Manager, may finalise the Issue Price at or below such Cut-Off Price, i.e., at or below ₹22. All Bids at or above this Issue Price and cut-off Bids are valid Bids and are considered for allocation in the respective categories.

\*Internal Accruals include funds raised from Issue of shares, cash accruals for the year and short-term debt, if any. The working capital projections made by the Company are based on certain key assumptions, as set out below:

#### Overall Working Capital Requirement Justification:

##### 1. Business Model and Inventory Intensity

For the Financial Year 2025–26, Our Company has projected its turnover based on expected sales during the peak sowing seasons, supported by confirmed orders and ongoing demand from dealers and distributors. As of June 30, 2025, the Company has recorded revenues in the first quarter, reflecting normal seasonal business activity. Based on historical sales patterns, seasonal demand trends, and existing order visibility, the projected turnover for the full financial year has been estimated on a conservative basis and is considered reasonable.

Our Company's business model is seasonal and working capital intensive. Operations require advance procurement of seed material, followed by cultivation through contract farmers, harvesting, processing, grading, treatment, packing, and storage

of seeds prior to the selling season. This production and supply cycle spans several months, during which funds are deployed towards seed material, cultivation support, processing costs, packaging, storage, logistics, and other operating expenses, resulting in capital being blocked for extended periods before sales realisation.

Further, Our Company deals in a diversified range of field crop and vegetable seeds, which necessitates maintaining inventory across multiple varieties and specifications to cater to different agro-climatic conditions and customer requirements. Availability of ready stock at the commencement of the selling season is critical, as agricultural sowing cycles are time-sensitive and delays in supply may impact sales opportunities.

In addition, Our Company extends customary trade credit to dealers and distributors in the ordinary course of business, which contributes to higher levels of trade receivables during peak sales periods. At the same time, payments towards seed procurement, processing, and other operating expenses are required to be made on a timely basis, further increasing working capital requirements.

Accordingly, the availability of adequate working capital is a key operational requirement for Our Company. It enables the Company to maintain sufficient inventory levels, ensure uninterrupted processing and distribution, and effectively meet seasonal demand across markets. The proposed utilisation of Net Proceeds towards working capital requirements will support ongoing operations, enhance supply readiness during peak seasons, and facilitate smooth execution of business activities in the ordinary course of business..

## 2. Order Book Visibility and Certified Demand

As on the relevant date, Our Company has an auditor-certified order book of approximately ₹1312.50 Lakhs, which provides visibility with respect to near-term demand for its products. Execution of these orders, along with maintaining adequate inventory levels and supporting ongoing processing and distribution activities, requires deployment of sufficient working capital to ensure timely fulfilment in the ordinary course of business.

The order book as on the date of this Draft Red Herring Prospectus has been certified by M/s. Sunit M. Chhatbar & Co., Chartered Accountants, vide their certificate dated December 27, 2025.

The justifications for the holding period mentioned in the table above are provided below:

Sr. No.	Particulars	Assumptions
<b>Current Assets</b>		
1	Inventories:	<p>In the seed manufacturing business, inventories form an important component of working capital, as adequate stock is required to be available in advance of the sowing season to meet timely demand. Inventory levels are built up prior to the selling season and are realised over the course of the agricultural cycle.</p> <p>Our Company has historically maintained inventory holding in the range of 21 to 63 days during the financial years ended March 31, 2023, March 31, 2024, March 31, 2025, and for the period ended June 30, 2025, reflecting the seasonal nature of operations and advance stocking requirements across multiple crop varieties.</p> <p>Based on the average inventory holding period of the last three financial years and stub period, our Company has projected an inventory holding period of approximately 46 days for Financial Years 2026 and 2027. This level is considered appropriate to support routine operations, ensure availability of stock during peak sowing periods, and facilitate timely execution of orders in the ordinary course of business.</p>
2	Trade receivables	Trade receivables form a part of our working capital, as sales are carried out through dealers and distributors in the ordinary course of business. Our Company has historically maintained a receivables cycle in the range of 13 to 26 days during the financial years ended March 31, 2023, March 31, 2024, March 31, 2025, and for the period ended June 30, 2025.

Sr. No.	Particulars	Assumptions
		Based on historical trends and customary credit practices, our Company has assumed a receivables cycle of approximately 18 days for Financial Years 2026 and 2027. This assumption is considered reasonable for supporting routine business operations and seasonal sales requirements.
3	Other current assets including Short term loans and advances	<p>This category primarily comprises prepaid expenses, advances to suppliers, balances with government authorities (including statutory credits and deposits), staff advances, and other receivables arising in the ordinary course of business. These items are routine in nature and incidental to day-to-day operations.</p> <p>Based on past experience and the recurring nature of such balances, our Company does not expect any material variation under this head going forward. Accordingly, no significant incremental working capital requirement is envisaged in respect of these items.</p>
<b>Current Liabilities</b>		
4	Trade payables	<p>Trade payables form a part of our working capital cycle and arise primarily in the ordinary course of business. Historically, our Company's trade payable cycle has remained within a moderate range, reflecting customary payment practices followed with suppliers.</p> <p>During the financial years ended March 31, 2023, March 31, 2024, March 31, 2025, and for the period ended June 30, 2025, the trade payable holding period has generally ranged between 8 and 11 days. This reflects the nature of procurement arrangements and payment terms followed by the Company in its routine operations.</p> <p>Based on historical trends and operational considerations, our Company has assumed a trade payable holding period of approximately 8 days for Financial Years 2026 and 2027. This assumption is considered reasonable and consistent with past experience.</p> <p>Accordingly, no significant change in the trade payable cycle is envisaged, and working capital requirements under this head are expected to remain aligned with the scale of operations in the ordinary course of business.</p>
5	Other current liabilities	<p>Other current liabilities of our Company primarily comprise advances from customers, statutory payables, employee-related payables, and other routine business obligations. These liabilities arise in the ordinary course of business and are generally settled within a short period.</p> <p>Historically, the holding period for other current liabilities has remained low during the previous financial years, reflecting the routine and short-term nature of such obligations. Based on past trends and operational considerations, our Company has assumed that the holding period for other current liabilities will continue to remain at similar levels for Financial Years 2025–26 and 2026–27. Accordingly, no significant incremental working capital requirement is projected under this head.</p>

As certified by M/s. Sunit M Chhatbar & Co., Chartered Accountants, by way of their certificate dated December 27, 2025.

#### WORLD ECONOMY OUTLOOK

##### GLOBAL OUTLOOK

Global growth is slowing due to a substantial rise in trade barriers and the pervasive effects of an uncertain global policy environment. Growth is expected to weaken to 2.3 percent in 2025, with deceleration in most economies relative to last year. This would mark the slowest rate of global growth since 2008, aside from outright global recessions. In 2026-27, a tepid recovery is expected, leaving global output materially below January projections. Progress by emerging market and developing economies (EMDEs) in closing per capita income gaps with advanced economies and reducing extreme poverty is anticipated to remain insufficient. The outlook largely hinges on the evolution of trade policy globally. Growth could turn out to be lower if trade restrictions escalate or if policy uncertainty persists, which could also result in a build-up of financial stress. Other downside risks include weaker-than-expected growth in major economies with adverse global spillovers, worsening conflicts, and extreme weather events. On the upside, uncertainty and trade barriers could diminish if major economies reach lasting agreements that address trade tensions. The ongoing global headwinds underscore the need for determined multilateral policy efforts to foster a more predictable and transparent environment for resolving trade tensions, some of which stem from macroeconomic imbalances. Global policy efforts are also needed to confront the deteriorating circumstances of vulnerable EMDEs amid prevalent conflict and debt distress, while addressing long-standing challenges, including the effects of climate change. National policy makers need to contain risks related to inflation as well as strengthen their fiscal positions by raising additional domestic revenues and re-prioritizing spending. To facilitate job creation and boost long-term growth prospects in EMDEs, reforms are essential to enhance institutional quality, stimulate private investment growth, develop human capital, and improve labor market functioning.

#### REGIONAL PROSPECTS

All EMDE regions face a challenging outlook amid the rise in trade tensions and heightened global uncertainty. In 2025, growth is projected to slow in East Asia and Pacific as well as in Europe and Central Asia—both regions that are highly reliant on global trade—and, to a lesser extent, in South Asia. In Latin America and the Caribbean, growth is projected to be the lowest among EMDE regions over the forecast horizon, as activity is held back by high trade barriers and long-standing structural weaknesses. In regions with a large number of commodity exporters, including in the Middle East and North Africa and Sub-Saharan Africa, growth is anticipated to face drags from the weakening outlook for external commodity demand. Against the backdrop of a deteriorating global environment, growth forecasts for 2025 have been downgraded in all EMDE regions relative to January projections.

#### INDIAN ECONOMY OVERVIEW

##### INTRODUCTION

India's economic journey over the past few years has been marked by remarkable growth and a steady rise in its position on the global stage. After overtaking the United Kingdom (UK) to become the fifth largest economy in Q1 FY23, India has continued this upward trajectory to surpass Japan in June 2025 to become the fourth largest economy in the world. With a nominal Gross Domestic Product (GDP) of Rs. 3,31,03,000 crore (US\$ 3.78 trillion), India's growth reflects a combination of strong domestic demand and policy reforms positioning the country as a key destination for global capital.

Further, India is projected to reach a GDP of Rs. 4,26,45,000 crore (US\$ 5 trillion) by 2027 and is on course to surpass Germany by 2028. Rising employment and increasing private consumption, supported by rising consumer sentiment, will support GDP growth in the coming months.

## MARKET OVERVIEW

India's Real Gross Domestic Product (GDP) or GDP at Constant Prices stood at Rs. 47.89 lakh crore (US\$ 544.20 billion) in Q1 of FY26, up from Rs. 44.42 lakh crore (US\$ 504.77 billion) in Q1 FY25, registering a growth rate of 7.8%. Nominal GDP or GDP at Current Prices for the same period was estimated at Rs. 86.05 lakh crore (US\$ 977.84 billion), compared to Rs. 79.08 lakh crore (US\$ 898.64 billion) in the corresponding quarter of the previous year, showing a growth rate of 8.8%.

As on October 14, 2025, India is home to 123 unicorns, with six new startups achieving unicorn status in 2025.

India's current account recorded a deficit of Rs. 21,288 crore (US\$ 2.37 billion) in Q1 FY26 (April-June), compared to Rs. 76,282 crore (US\$ 8.6 billion) in the same period of FY25, according to the Reserve Bank of India (RBI). The improvement reflects a narrower merchandise trade gap and steady growth in service exports. Exports fared remarkably well during the pandemic and aided recovery when all other growth engines were losing steam in terms of their contribution to GDP. Going forward, the contribution of merchandise exports may waver as several of India's trade partners witness an economic slowdown. According to Minister of Commerce and Industry, Consumer Affairs, Food and Public Distribution and Textiles Mr. Piyush Goyal, Indian exports are expected to reach US\$ 1 trillion by 2030.

## RECENT DEVELOPMENTS

India is primarily a domestic demand-driven economy, with consumption and investments contributing to 70% of the economic activity. With India's economy showing resilient growth, supported by strong domestic demand, policy reforms, and a healthy investment pipeline, several new projects and developments are underway across key sectors. According to World Bank, India must continue to prioritise lowering inequality while also putting growth-oriented policies into place to boost the economy. In view of this, there have been some developments that have taken place in the recent past. Some of them are mentioned below.

- On the FDI front, according to the Department for Promotion of Industry and Internal Trade (DPIIT), India's cumulative FDI inflow stood at Rs. 97,22,411 crore (US\$ 1.09 trillion) between April 2000-June 2025; with major share coming from Singapore at Rs. 12,57,392 crore (US\$ 142.88 billion) with a total share of 24%, followed by Mauritius at Rs. 11,10,692 crore (US\$ 126.22 billion) with 21%, the USA at Rs. 5,41,654 crore (US\$ 61.56 billion) with 10%, the Netherlands at Rs. 3,68,694 crore (US\$ 41.90 billion) with 7%, and Japan at Rs. 2,88,090 crore (US\$ 32.74 billion) with 6%.

Mumbai led in investment value, while Bangalore topped in deal volume, reaffirming their positions as India's leading investment hubs.
- Foreign Institutional Investors (FIIs) have been net sellers in the Indian equity market since July, withdrawing over Rs. 1 lakh crore (US\$ 11.36 billion) between July 1, 2025, and September 8, 2025, including Rs. 7,800 crore (US\$ 886.4 million) in September, while in August 2025, Domestic Institutional Investors (DIIs) recorded their 25th straight month of net inflows, investing Rs. 94,829 crore (US\$ 10.8 billion), the highest in 10 months. In the first five months of FY26, DIIs invested Rs. 3.24 lakh crore (US\$ 37.6 billion), already 53% of the total investment made in FY25.
- India's manufacturing sector strengthened further in August 2025, supported by firm demand that drove higher factory orders and production. Firms increased input purchases and hiring, backed by improved business confidence. Input inventories continued to rise and finished goods stocks expanded for the first time in nine months. The HSBC India Manufacturing Purchasing Managers' Index (PMI) rose from 59.1 in July to 59.3 in August, marking the strongest

improvement in operating conditions in over 17 years, with moderate cost pressures and a sharper rise in selling prices.

- India's Consumer Price Index (CPI)-based inflation eased to an over eight-year low of 1.54% in September 2025, down from 2.05% in August 2025, driven by lower food and fuel prices, according to data from the Ministry of Statistics and Program Implementation (MoSPI).
- India's GST collections reached an all-time high of Rs. 2.37 lakh crore (US\$ 26.93 billion) in April 2025, rising 12.6% YoY. The growth was supported by strong domestic demand and higher imports, with domestic revenues up 10.7% and import revenues up 20.8%.
- Indian airlines carried over 1.36 crore passengers (13.6 million) in June 2025, marking an increase from the same period last year, as per official data.
- The government is focusing on renewable energy sources and has achieved a major clean energy milestone by generating 50% of its power from renewable sources, five years ahead of its 2030 target. India is committed to achieving the country's ambition of Net Zero Emissions by 2070 through a five-pronged strategy, 'Panchamrit'. Moreover, India ranked 3rd in the renewable energy country attractive index.
- India secured 39th position out of 133 economies in the Global Innovation Index 2024. India rose from 81st position in 2015 to 39th position in 2024. India ranks 3rd position in the global number of scientific publications.
- In May 2025, the overall Index of Industrial Production (IIP) stood at 156.6 (base 2011–12 = 100), reflecting a YoY growth of 1.2%. The mining, manufacturing and electricity sectors stood at 136.6, 154.3 and 216 respectively.
- According to data released by the Ministry of Statistics & Programme Implementation (MoSPI), India's Consumer Price Index (CPI) – Combined inflation was 3.34% in March 2025 against 4.85% in March 2024.
- India's wheat procurement for FY26 has reached 29.7 million tonnes as of May 22, 2025, the highest in four years and up 13.5% YoY. Strong production of 115.43 million tonnes, favourable weather, and bonuses above the Minimum Support Price (MSP) in key states have driven this growth. The Food Corporation of India expects procurement to hit 32.5 million tonnes by season end, raising stocks to 44 million tonnes, well above the 18.4 million tonnes needed for the Public Distribution System.

## GOVERNMENT INITIATIVES

Over the years, the Indian government has introduced many initiatives to strengthen the nation's economy. The Indian government has been effective in developing policies and programmes that are not only beneficial for citizens to improve their financial stability but also for the overall growth of the economy. Over recent decades, India's rapid economic growth has led to a substantial increase in its demand for exports. Besides this, a number of the government's flagship programmes, including Make in India, Start-up India, Digital India, the Smart City Mission, and the Atal Mission for Rejuvenation and Urban Transformation, is aimed at creating immense opportunities in India. ## ROAD AHEAD

India's economy grew by 6.5% in FY25. With a 7.4% growth rate in Q4 FY25, the RBI has revised India's GDP growth forecast for FY26 upwards to 6.8% from earlier estimate of 6.5%. India's comparatively strong position in the external sector reflects the country's positive outlook for economic growth and rising employment rates. In 2024, India rose to 15th place globally in FDI rankings and retained its position as South Asia's top recipient.

In H1 FY25, India's growth-focused approach was underscored by the government's capital expenditure outlay of Rs. 15,02,000 crore (US\$ 176 billion), reinforcing its commitment to infrastructure-led development. In the Union Budget of FY26, capital expenditure took lead by steeply increasing the capital expenditure outlay by 10% to Rs. 11,21,000 crore (US\$ 131 billion) over Rs. 10,18,000 crore (US\$ 119 billion) in FY25. Stronger revenue generation because of improved tax compliance, increased profitability of the company, and increasing economic activity also contributed to rising capital spending levels.

India's total goods and service exports surged by 76% over the past decade, touching Rs. 70,36,425 crore (US\$ 825 billion) in FY25, driven by strong performance in engineering goods, electronics, and pharmaceuticals. With a reduction in port congestion, supply networks are being restored. With a proactive set of administrative actions by the government, flexible monetary policy, and a softening of global commodity prices and supply-chain bottlenecks, inflationary pressures in India look to be on the decline overall.

## AGRICULTURE INDUSTRY IN INDIA

Agriculture is one of the cornerstones of India's economy and society, providing a livelihood to nearly 55% of the population. With the world's second-largest agricultural land area, India is a global leader in farm output.

The country has the largest cattle herd (buffaloes), the largest area under wheat, rice, and cotton, and ranks as the world's top producer of milk, pulses, and spices. It is also the second-largest producer of fruits, vegetables, tea, farmed fish, cotton, sugarcane, wheat, and rice, underscoring its central role in global food supply.

The food industry in India is poised for rapid growth, driven by its immense potential for value addition. The food processing industry alone accounts for 32% of the country's total food market and ranks fifth globally in terms of production, consumption, exports, and growth potential.

Beyond generating employment for millions of farmers, the sector plays a vital role in rural industrialization, supply chain development, and food security.

India's agricultural output has expanded significantly in the past decade, recording 40% growth and achieving surplus capacity for exports. In FY25, the sector grew by 5.4% year-on-year, supported by record production and higher trade volumes. Agricultural exports touched an all-time high of Rs. 4,40,000 crore (US\$ 51.86 billion) in FY25, up from Rs. 3,95,793 crore (US\$ 48.15 billion) in FY24. Agriculture and allied activities together contributed 17.8% to India's GDP in 2023-24, reaffirming the sector's importance to the national economy.

Production levels continue to rise steadily. According to the Third Advance Estimates, foodgrain production for 2024-25 is projected at a record 3,539.59 LMT, up 6.5% from the previous year. Rice production alone is expected to reach 1,490.74 LMT, an increase of 112.49 LMT YoY. Horticulture output has also shown remarkable growth, climbing from 280.70 million tonnes in 2013-14 to 367.72 million tonnes in 2024-25.

## MARKET SIZE

The exports for principal commodities in FY25 were the following:

- Marine Product: US\$ 6.73 billion
- Basmati and Non-Basmati Rice: US\$ 11.29 billion
- Spices: US\$ 3.79 billion
- Buffalo Meat: US\$ 3.69 billion
- Sugar: US\$ 1.86 billion
- Miscellaneous processed items: US\$ 1.53 billion
- Oil Meal: US\$ 1.22 billion

India's agricultural and processed food exports rose 7.1% year-on-year in Q1 FY26, reaching Rs. 51,071 crore (US\$ 5.96 billion). This growth was driven by strong shipments of rice, meat, and fruits. Looking ahead, rice exporters expect sustained demand from West Asia, even as the sector navigates tariff-related challenges in the US.

As on September 5, 2025, the area sown under Kharif crops is 110.5 million hectares as compared to 107.85 million hectares during the corresponding period of last year.

India's wheat stocks highest in three years as of March 2025. The Food Corporation of India aims to purchase 31 million tons of wheat in 2025. Rice reserves are also high, potentially boosting exports.

Foreign investment has also supported growth in the sector. From April 2000 to March 2025, India received Rs. 18,948 crore (US\$ 3.12 billion) in FDI inflows into agriculture services and Rs. 12,298 crore (US\$ 1.73 billion) in agricultural machinery. The food processing industry has been a major draw, attracting cumulative FDI equity inflows of Rs. 86,824 crore (US\$ 13.12 billion) over the same period, accounting for 1.85% of total FDI inflows across industries.

Within food processing, processed vegetables contributed Rs. 5,945.4 crore (US\$ 697 million) in FY25, miscellaneous processed items stood at Rs. 13,102.1 crore (US\$ 1,536 million), and processed fruits and juices accounted for Rs. 7,898.8 crore (US\$ 926 million). This growth is supported by rising incomes in both rural and urban areas, as well as rapid population expansion that continues to fuel demand for diverse agricultural and processed products.

The sector is also witnessing increasing adoption of modern technologies. Tools such as blockchain, artificial intelligence (AI), geographic information systems (GIS), drones, and remote sensing are being leveraged to enhance efficiency and transparency. Alongside, various e-farming applications are enabling farmers and agribusinesses to improve productivity and market access.

## ROAD AHEAD

India's agriculture sector is poised for sustained growth, supported by rising exports, greater investments, and targeted policy interventions. Agriculture and fisheries exports grew from Rs. 2,49,264 crore (US\$ 35.16 billion) in FY20 to Rs. 4,33,819 crore (US\$ 51.23 billion) in FY25, registering a CAGR of 7.82%. Tamil Nadu has set an ambitious target of Rs. 42,745 crore (US\$ 5 billion) in seafood exports by strengthening coastal infrastructure and promoting value addition, while India as a whole aims to achieve Rs. 8,549 crore (US\$ 1 billion) turmeric exports by 2030 through the National Turmeric Board and the SPICED scheme, retaining its dominant 58-66% global market share.

Stronger investment in infrastructure is expected to further boost momentum. Over the next five years, the central government plans to attract US\$ 9 billion in the fisheries sector under the PM Matsya Sampada Yojana. In parallel, the Union Cabinet has approved the Prime Minister Dhan-Dhaanya Krishi Yojana (PMDDKY), with an outlay of Rs. 24,000 crore (US\$ 2.79 billion) from FY26, to enhance farm productivity, irrigation, credit access, and post-harvest facilities for 1.7 crore farmers across 100 districts. The Ministry of Food Processing Industries (MoFPI) is also pushing ahead with investments in food processing through the continued implementation of PMKSY, with an allocation of Rs. 4,600 crore (US\$ 559.4 million) till March 2026.

Agricultural credit is another area of focus. Projections indicate that credit will exceed Rs. 31.5 lakh crore (US\$ 368.55 billion) in FY26, supported by the National Bank for Agriculture and Rural Development (NABARD) as it works to address regional disparities and extend support to tenant farmers. The adoption of food safety and quality assurance frameworks such as Total Quality Management (TQM), ISO 9000, ISO 22000, HACCP, Good Manufacturing Practices (GMP), and Good Hygienic Practices (GHP) is expected to improve product standards, support exports, and increase global competitiveness of Indian agri-products.

Crop diversification and innovation will also play a critical role in shaping the sector's outlook. India is expected to become self-sufficient in pulses in the coming years, backed by early-maturing seed varieties and higher minimum support prices. Maize production could potentially double to 86 million tonnes by 2047, offering attractive opportunities through high-yield seeds and better crop management. The dairy sector is projected to expand by 11-13% in FY26, driven by value-added products (VAPs) and investments worth Rs. 3,400 crore (US\$ 398 million), raising the share of VAPs to 45% while improving margins by 20-30 basis points.

Overall, with strategic investments in infrastructure, continued reforms, and a strong export pipeline, India's agriculture sector is well-positioned to sustain growth, diversify output, and strengthen its global footprint in the coming decade.

## SEEDS INDUSTRY IN INDIA

The current India seed market size stands at USD 3.82 billion in 2025 and is projected to reach USD 5.00 billion by 2030, reflecting a forecast CAGR of 5.55%. Sustained policy support, rising certified-seed penetration, and expanding climate-smart varieties continue to anchor industry resilience. Government programs such as the National Mission on High-Yielding Seeds and the Clean Plant Program are fast-tracking premium seed adoption by funding disease-free planting material hubs, demonstration plots, and village-level clusters. Row crops dominate revenue because cereals, oilseeds, and fiber crops align with food-security and import-substitution priorities, while hybrids retain farmer loyalty thanks to consistent yield premiums under erratic rainfall. Meanwhile, protected cultivation and digital traceability pilots are opening lucrative niches for specialized vegetable and high-value seed segments. Competitive intensity is low because multinational pipelines compete with regionally adapted portfolios, yet counterfeit trade and GM regulatory uncertainty exert margin pressure.

## KEY REPORT TAKEAWAYS

- By breeding technology, hybrids commanded 70.1% of India's seed market share in 2024, and hybrids are set to advance at a 5.68% CAGR through 2030.
- By cultivation mechanism, Open Field accounted for a 99.8% share of the India seed market size in 2024, and protected cultivation seeds are forecast to expand at an 11.08% CAGR between 2025 and 2030.
- By crop type, row crops accounted for an 80.6% share of the India seed market size in 2024 and are projected to grow at

a 5.56% CAGR through 2030.

- By geography, Maharashtra holds a 13.6% share of the India seed market size in 2024, and Haryana logs a 6.7% CAGR through 2030.

### GOVERNMENT CLUSTER PROGRAMS SCALING CERTIFIED SEED DEMAND

National seed missions are knitting together research stations, processors, and farmers. Budget 2025 earmarked significant amount to support nucleus and breeder seed production and to launch low-productivity-district pilots that showcase certified versus farm-saved seed yields.<sup>[1]</sup> Mandatory performance labeling under the forthcoming Seeds Bill 2004 will institutionalize cultivar transparency, prompting both public breeders and private firms to recalibrate supply chains toward certified output. Demonstration plots within 100 priority districts expose productivity gaps, stimulating pull demand that lets seed firms scale single-variety batches at lower unit costs. Concurrently, village seed banks are reducing last-mile logistics hurdles, enabling rapid replenishment of short-duration hybrids during mid-season replanting windows.

### SHIFT TO CLIMATE-RESILIENT HYBRIDS IN CEREALS AND PULSES

India's rain-fed cropland faces heat and moisture volatility that undermines legacy varieties. Till 2024, the National Agricultural Research System released 331 cotton, 239 maize, and 92 soybean cultivars carrying stacked drought, heat, and pest-tolerance traits. Public-private consortia now deploy molecular breeding and doubled haploids to shorten hybrid-development cycles from 11 to 7 years. For pulses, the six-year Mission for Atmanirbharta channels subsidized foundation seed into Tur and Masoor clusters, encouraging seed multipliers to produce stress-adapted hybrids that align with the government's plan to cut pulse imports to zero by 2030. Gene-edited rice lines using CRISPR, exempted from stringent GM regulations, will enter confined field trials this year. These developments expand the India seed market by widening cultivar portfolios that can withstand multi-factor stress.

### EXPANSION OF PROTECTED CULTIVATION BOOSTING HIGH-VALUE VEGETABLE SEEDS

Government credit windows under the Agriculture Infrastructure Fund allow smallholders to finance polyhouse construction at subsidized rates, which in turn unlocks premium seed demand for bell pepper, cucumber, and indeterminate tomato. True potato seed (TPS) technology cuts planting material weight from 2,500 kg of tubers to 25 g of seed per hectare, lowering cold-chain costs and opening export avenues for TPS packets. Field trials of TPS under controlled structures in Maharashtra recorded a yield uptick compared with conventional sprouted tubers. Seed firms are retooling pelleting and priming lines to service this controlled-environment boom, reinforcing the upward pull on the India seed market.

### DIGITAL CROP-SURVEY DATA UNLOCKING HYPER-LOCAL SEED TARGETING

Machine-learning dashboards fuse soil, weather, and sowing windows to generate pin-code-level variety recommendations. Participating seed companies already observe 15-20% sales gains in districts where agronomic advisories accompany QR-coded seed packs. Drone subsidies covering 75% of hardware costs accelerate variable-rate seeding, rewarding cultivars

optimized for precise plant population. Digitized data trails also simplify e-vouchers and direct-benefit transfers, expanding certified seed affordability among marginal farmers.

## RESTRAINTS IMPACT ANALYSIS

RESTRAINT	(-) % IMPACT ON CAGR FORECAST	GEOGRAPHIC RELEVANCE	IMPACT TIMELINE
Counterfeit seed trade and weak last-mile traceability	-0.8%	National, concentrated in Bihar, Uttar Pradesh, and West Bengal	Short term ( $\leq 2$ years)
Regulatory uncertainty around GM crop approvals	-0.6%	National, affecting all crop segments	Long term ( $\geq 4$ years)
Farm-saved seed dominance in rain-fed zones	-0.4%	Rajasthan, Madhya Pradesh, Maharashtra, and Karnataka	Long term ( $\geq 4$ years)
Rising seed-treatment costs are squeezing smallholders	-0.3%	National, acute in marginal farming areas	Medium term (2-4 years)

Source: Mordor Intelligence

## COUNTERFEIT SEED TRADE AND WEAK LAST-MILE TRACEABILITY

An estimated 10-15% of seed sold in high-volume states travels outside the formal certification net. Counterfeit packets mimic legitimate brands, eroding farmer trust and depressing repeat purchases of premium hybrids. Distribution chains composed of micro-retailers lack digital inventory systems, impeding batch trace-backs when quality complaints arise. Pilot blockchain registries have demonstrated end-to-end visibility but need nationwide dealer onboarding and smartphone penetration. Until enforcement stiffens, counterfeit leakage will shave points off the India seed market growth outlook.

## REGULATORY UNCERTAINTY AROUND GM CROP APPROVALS

Supreme Court litigation over biosafety assessments maintains a moratorium on new food-crop transgenics. Although Bt cotton remains legal, companies hesitate to commercialize second-generation insect-resistant events or herbicide-tolerant stacks without predictable approval cycles. This policy cloud deflects R&D investment toward traits that stop short of transgenesis, narrowing the technology menu and delaying potential yield leaps. Farmer organizations lobbying for GM mustard and brinjal approvals underscore pent-up demand, but until a clear pathway emerges, the India seed market forfeits the value that biotech traits could unlock.

## SEGMENT ANALYSIS

### *By Breeding Technology: Hybrid Dominance Reinforced by Climate Resilience*

India seed market size for hybrids reflects the segment's 70.1% revenue share and sets the stage for a 5.68% CAGR through 2030. Yield differentials of 15-35% over open-pollinated lines, combined with built-in pest and drought tolerances, sustain farmer willingness to pay. Non-transgenic hybrids dominate volume because they straddle regulatory clarity and consumer acceptance. Transgenic hybrids contribute under 5% of segment revenue, capped by the GM approval hiatus, yet hold latent upside once policy hurdles ease.

Innovation momentum remains strong. Marker-assisted back-crossing inserts triple-stack resistance against wilt, thrips, and sterility mosaic in pigeon pea hybrids, while doubled-haploid platforms trim generation cycles in maize. Direct-seeded rice hybrids under the RiceTec-Mahyco venture deliver shorter maturity and mechanization compatibility, dovetailing with water-conservation drives. Robust pipeline visibility keeps the India seed market aligned with mechanization and export-oriented agriculture trends.

## India Seed Market: Market Share by Breeding Technology, 2024

Source: Mordor Intelligence

### **By Cultivation Mechanism: Protected Cultivation Gains Traction**

The India seed market size in open field accounted for a 99.8% share of the India seed market size in 2024, and protected cultivation seeds are forecast to expand at an 11.08% CAGR between 2025 and 2030. Break-even analysis under national subsidy schemes shows growers recouping greenhouse investment within 30 months when leveraging high-density, indeterminate tomato lines that yield 280 metric tons per hectare. Uniformity and disease resistance top trait wish-lists, prompting breeders to re-select parental lines for vertical canopy structure and synchronized fruit setting.

Seed supply chains adapt by introducing small-gram, high-unit-value packets that align with greenhouse transplant schedules. Companies deploy agronomists to steer nutrient and pruning regimes, ensuring genetic potential translates to yield. As greenhouse acreage compounds, protected cultivation's double-digit growth rate promises a steadily expanding niche within the wider India seed market.

### **By Crop Type: Row Crop Priority Mirrors National Food Agenda**

By crop type, row crops accounted for an 80.6% share of the India seed market size in 2024 and are projected to grow at a 5.56% CAGR through 2030. Cotton holds the largest single-crop revenue block, buoyed by Bt hybrids and integrated pest-management packages compliant with export lint standards. Corn receives policy tailwinds via ethanol-blending mandates that anticipate a good biofuel share by 2030, intensifying demand for high-starch hybrids.

Vegetable seed revenue, while smaller, outpaces row crops in growth as urban middle-class diets diversify. Compact onion and long-shelf-life tomato hybrids claim greenhouse slots, while TPS makes inroads into both protected and open fields. Pulse hybrids, riding Atmanirbharta incentives, expand breeder-seed orders for Tur and Masoor, albeit from a modest base. These shifts maintain a balanced portfolio that defends the India seed market from commodity price swings.

## India Seed Market: Market Share by Crop Type, 2024

Source: Mordor Intelligence

## **Geography Analysis**

Maharashtra's 13.6% grip on the India seed market is rooted in its dense web of public institutes and private multiplication farms, and Haryana logs a 6.7% CAGR through 2030. Seed villages in Jalna and Hingoli districts supply cross-pollinated crops, whereas Nanded hosts greenhouse clusters for tomato and capsicum breeder seed.

Gujarat and Karnataka capitalize on processing clusters and special economic zones that expedite export seed shipments. Digital platforms integrate with state procurement portals, enabling real-time aggregation of seed demand and trimming distributor margins. This diffusion of infrastructure underpins the broader expansion of the India seed market.

Emerging eastern and northeastern states register steeper growth off a lower base. Bihar's new Makhana Board champions specialty aquatic-crop seed systems, while West Bengal's paddy clusters adopt direct-seeded rice under mechanization drives<sup>[2]</sup>. Telangana's agri-biotech parks support gene-editing spin-offs that feed elite lines into local seed firms. These developments broaden geographic resilience and mitigate over-reliance on Western states for seed supply.

## **Competitive Landscape**

Market structure remains fragmented: the top five firms capture a good share of revenue, followed by dozens of regional seed houses. Multinationals such as Bayer AG and Corteva Inc., lean on deep R&D pipelines and proprietary trait stacks, whereas regional champions like Nuziveedu Seeds and Kaveri Seeds wield intimate agro-ecological knowledge and extensive dealer networks. Public institutions license pre-breeder material under liberalized terms, spawning a wave of small and medium enterprises that specialize in niche crops.

Strategic alliances multiply. PowerPollen's collaboration with VNR Seeds brings pollen-capture technology to corn seed production, boosting hybrid vigor and seed set efficiency. Nuziveedu Seeds established a partnership with the Indian Agricultural Research Institute to develop advanced pigeon pea varieties, enhancing collaboration between public and private research institutions.<sup>[3]</sup> International Seed Federation and CGIAR's five-year memorandum streamlines regulatory harmonization, reducing time-to-market for varieties that satisfy multiple national testing regimes. Service start-ups offer drone-based pollination counts and seed-field phenotyping, complementing physical input sales with data subscriptions.

Counterfeit threats and GM policy gridlock shape competitive strategy. Firms invest in tamper-proof holograms and QR codes linked to blockchain registries to safeguard brand equity. Limited scope for trait differentiation in transgenic space intensifies price and service competition in non-GM hybrids. Yet, gene-edited lines now pass under relaxed regulation, positioning innovation-ready companies to steal a march once consumer acceptance crystallizes.

## **Recent Industry Developments**

- October 2025: The PM Dhan-Dhaanya Krishi Yojana, launched in New Delhi, aims to enhance agricultural development in 100 districts with low productivity through improvements in irrigation systems, seed quality, credit accessibility, and storage infrastructure.
- September 2024: PowerPollen and VNR Seeds initiated a pollination-technology pilot in Indian corn-seed production, targeting superior hybrid yields.

### OVERVIEW OF OUR BUSINESS

Our Company was originally formed as a partnership firm under the name ‘M/s Super Vegetable Seeds’ (“**Partnership Firm**”) pursuant to a deed of partnership dated January 01, 2018 under the Indian Partnership Act, 1932 (“Partnership Act”). Subsequently, Fresh Certificate of Registration dated August 30, 2022 bearing number GUJRJ111794 was issued by Registrar of Firms. The partnership firm was thereafter converted from ‘M/s Super Vegetable Seeds’ into Public Limited Company under Section 366 Part I of Chapter XXI of the Companies Act, 2013, as ‘Dhanwel Hybrid Seeds Limited’, pursuant to a certificate of incorporation dated February 20, 2024 issued by the Registrar of Companies, Central Registration Centre. The Corporate Identification Number of our Company is U46101GJ2024PLC148851.

Our Company is engaged in the business of seed manufacturing, which includes the development, multiplication, processing, and supply of seeds for a variety of field crops and vegetables. The seed production process is carried out in a structured manner across multiple stages and involves the use of improved genetic seed material procured from recognised sources. Such seed material is multiplied, processed, conditioned, and handled in accordance with prescribed agronomic and processing practices to produce seeds suitable for agricultural use, including seeds supplied to farmers for crop cultivation.

The Company procures genetic seed material, including breeder and other suitable seed material, from recognised agricultural institutions, government-supported research organizations and open market. In addition, seed production is undertaken through arrangements with identified seed-growing farmers, wherein agricultural land owned by such farmers is utilised for cultivation. Under these arrangements, the Company supplies the requisite seed material and provides technical guidelines and cultivation protocols. The farmers carry out sowing and related agricultural operations in accordance with the Company’s instructions, while the Company’s field staff and agronomists monitor and supervise the crop to maintain quality standards. Although the ownership of agricultural land remains with the farmers, seed production undertaken through contractual arrangements is carried out in accordance with the Company’s prescribed guidelines and supervision, and all subsequent processing, quality control, and commercial activities relating to such seeds are undertaken by the Company.

Post-harvest, the cultivated seeds are transported to the Company’s processing facility, where they undergo a series of controlled operations, including mechanical cleaning to remove inert matter and impurities, precision grading to ensure uniformity, and seed treatment to enhance storability and protect against pests and diseases. Thereafter, the processed seeds are systematically packed using appropriate packaging standards to preserve quality, viability, and genetic characteristics prior to storage and distribution. The Company’s seed processing unit is located at Jashapar, Kalavad, in Jamnagar District and is equipped with modern infrastructure spread across an area of over 10,218 square feet.

Our Company presently works with a limited number of contract seed-growing farmers under formal arrangements. However, our Company is not dependent exclusively on such contract farmers for seed availability. In cases of operational requirements,

crop-specific demand, or supply constraints, the Company also procures seeds directly from farmers and the open market. Such procured seeds are thereafter subjected to sorting, cleaning, grading, processing, quality checks, labelling, and packing at the Company's processing facility before being sold in the market.

Our team comprises experienced agronomists, field staff, and technicians who ensure adherence to quality standards, support productivity improvements, and implement sustainable agricultural practices. Over time, our Company has established strong working relationships with the farming community and continues to follow an integrated approach that includes sourcing, production, quality control, and supply of seeds. Our seeds are sold under the brand name "**Dhanwel Seeds**". Our Company is ISO 9001:2015 certified and is committed to maintaining consistent seed quality and supporting the agricultural sector with reliable seed solutions.

Promoters of our Company are Mr. Kishankumar Gordhanbhai Meghani, Mr. Vimal Mansukhbhai Vekariya, Mr. Sudhir Mohanbhai Pipaliya and Mr. Nikul Mansukhbhai Vekariya.

## MANUFACTURING PROCESS

The operational process of the Company, prior to seeds being offered for sale in the market, involves the procurement of improved genetic seed material from recognised and other permissible sources and open market, followed by seed production undertaken through arrangements with seed-growing farmers in accordance with prescribed agronomic practices and under the Company's supervision. In addition, to meet operational requirements and market demand, the Company may also procure seeds directly from farmers and the open market.

Upon harvest or procurement, as the case may be, the seeds are transported to the Company's processing facility, where they undergo systematic processing and conditioning operations, including cleaning, grading, treatment, and quality checks. Thereafter, the processed seeds are packed, labelled, and stored using appropriate standards, following which they are made available for sale in the ordinary course of business.

A schematic representation of the end-to-end process, from seed procurement to final sale, is provided below.

## **1. Procurement of Breeder/Foundation Seeds**

Our Company's seed production process commences with the procurement of improved genetic seed material, including breeder and other suitable seed material, from recognised agricultural institutions, government-supported research organisations, and open market. Such seed material is selected based on crop requirements, genetic characteristics, and suitability to relevant agro-climatic conditions and serves as the base input for further seed production and processing activities.

## **2. Supply of Breeder/Foundation Seeds to Contract Farmers**

The procured seed material is supplied to identified seed-growing farmers under contractual arrangements. Along with the supply of seeds, the Company provides technical guidelines, sowing schedules, and prescribed cultivation protocols to be followed during the crop cycle.

## **3. Production of Further Seeds**

The seed material supplied by our Company is cultivated by identified contract farmers on their own agricultural land in accordance with the agronomic practices and cultivation protocols prescribed by our Company. Our Company's field staff and agronomists monitor crop development, provide technical support, and supervise cultivation activities to ensure adherence to quality standards. While the ownership of agricultural land remains with the farmers, seed production under contractual arrangements is carried out in accordance with our Company's guidelines and supervision.

Our Company presently works with a limited number of contract seed-growing farmers under formal arrangements. However, our Company is not exclusively dependent on such contract farmers for seed availability. In the event of production shortfalls, crop failure, demand fluctuations, or operational requirements, our Company also procures seeds directly from farmers and the open market. Such procured seeds are subjected to the same internal standards of sorting, cleaning, grading, processing, quality checks, labelling, and packing at our Company's processing facility before being sold in the market.

## **4. Harvesting and Transportation**

Upon maturity of the seed crop, harvesting is carried out at an appropriate stage to maintain seed quality and viability. The harvested seeds are thereafter collected and transported to the Company's processing facility for further processing.

## **5. Seed Processing and Conditioning**

At the processing facility, the harvested seeds are subjected to a series of processing and conditioning activities. These include cleaning to remove inert matter, damaged seeds, and other impurities, as well as grading to achieve uniformity in size and quality. Conditioning and treatment processes are undertaken to improve storability and maintain seed performance, following which the seeds are prepared for subsequent quality checks, packing, and storage.

## **6. Quality Control and Testing**

The processed seeds are subjected to quality checks and testing to assess key quality parameters such as physical condition, germination, moisture levels, and overall suitability for agricultural use. These checks are carried out to ensure that the seeds meet the required quality standards before being packed and made available for sale.

## **7. Packing and Storage**

After completion of the prescribed quality checks, the processed seeds are packed using suitable packaging materials and labelling practices in accordance with standards. The packing process is carried out to facilitate safe handling, identification, and storage of seeds. Thereafter, the packed seeds are stored in designated storage areas under normal storage conditions until they are dispatched for distribution in the ordinary course of business.

## **8. Distribution**

The finished seeds are distributed through the Company's regular sales channels in the ordinary course of business to dealers, distributors, and farmers, as applicable. Such distribution is carried out without any long-term arrangements or formal agreements and is undertaken based on routine commercial transactions.

### GENERAL CORPORATE LAWS

#### **The Companies Act, 2013:**

The Companies Act, 2013 governs the incorporation, management, and regulation of companies in India, including a hybrid seed manufacturing company. Under this Act, such a company can be registered as a private limited or public limited company with a separate legal identity, limited liability for its shareholders, and perpetual succession. The Act mandates compliance with corporate governance norms, maintenance of statutory registers and records, holding board and general meetings, and filing periodic returns with the Registrar of Companies (RoC). Provisions related to director responsibilities, audit, financial statements, and shareholder rights ensure transparency and accountability, while sections on corporate social responsibility (CSR) may apply if the company meets threshold criteria. For a hybrid seed company, compliance under the Companies Act complements statutory obligations under seed certification, plant variety protection, and agricultural regulations, thereby providing a structured legal framework for operations, financial reporting, and governance.

#### **The Insolvency and Bankruptcy Code, 2016:**

The Insolvency and Bankruptcy Code (IBC), 2016 provides a legal framework for timely resolution of financial distress and insolvency of companies, including a hybrid seed manufacturing company. Under the IBC, if the company defaults on its financial obligations—such as loans, supplier payments, or statutory dues—creditors or the company itself can initiate a corporate insolvency resolution process (CIRP). This process, overseen by a Resolution Professional and adjudicated by the National Company Law Tribunal (NCLT), aims to restructure the company or liquidate its assets to maximize value for stakeholders. For a hybrid seed company.

#### **Transfer of Property Act, 1882:**

The Transfer of Property Act, 1882 governs the transfer of property—movable or immovable—by way of sale, lease, mortgage, gift, or exchange, and is applicable to a hybrid seed manufacturing company in managing its assets. For such a company, this Act provides the legal framework for purchasing or leasing land, factories, warehouses, or offices, transferring ownership of machinery and equipment, and entering into agreements for storage or distribution facilities. It ensures that all transfers are legally valid, enforceable, and documented, thereby protecting the company's property rights and minimizing disputes with landowners, tenants, or other parties. Compliance with the Act is crucial for securing title, possession, and contractual obligations, which directly impact operations such as seed production, storage, and distribution.

#### **The Registration Act, 1908:**

The Registration Act, 1908 mandates the registration of certain documents to ensure legal validity, authenticity, and public record, which is relevant for a hybrid seed manufacturing company in managing its immovable property and key agreements. Under this Act, documents such as sale deeds, lease agreements for factory premises, mortgage deeds, and long-term contracts related to property or equipment must be registered with the Sub-Registrar of Assurances to be legally enforceable. Registration provides proof of ownership, safeguards against disputes, and ensures legal recognition of rights and obligations. For a hybrid seed company, compliance with this Act is essential to protect land for seed production, storage facilities, and office premises, and to maintain a secure legal record of all property-related transactions.

### **The Specific Relief Act, 1963:**

The Specific Relief Act, 1963 provides legal remedies for the enforcement of civil rights, including the performance of contracts and protection of property, which is relevant for a hybrid seed manufacturing company in ensuring contractual obligations are met. Under this Act, the company can seek specific performance of agreements, such as supply contracts for seeds, raw materials, or equipment, instead of merely claiming damages for breach of contract. It also allows for injunctions to prevent unauthorized use of proprietary technology, trade secrets, or hybrid seed varieties. Compliance with this Act helps the company safeguard its intellectual property, enforce commercial agreements, and maintain operational continuity, thereby protecting its investments in research, production, and distribution of hybrid seeds.

### **The Indian Contract Act, 1872:**

The Indian Contract Act, 1872 governs the formation and enforcement of contracts in India and is highly relevant for a hybrid seed manufacturing company in managing its business relationships. Under this Act, the company can enter into valid agreements with suppliers, distributors, farmers, research partners, and customers for the sale or purchase of seeds, raw materials, and equipment. The Act ensures that all contracts are legally binding, enforceable, and fair, covering aspects such as offer, acceptance, consideration, and breach. Compliance with this Act allows the company to secure supply chains, enforce delivery commitments, claim damages for breach of contract, and maintain smooth commercial operations, which is crucial for timely production and distribution of hybrid seeds.

### **The Negotiable Instruments Act, 1881:**

The Negotiable Instruments Act, 1881 governs the use, transfer, and enforcement of negotiable instruments such as cheques, promissory notes, and bills of exchange, which are commonly used in business transactions by a hybrid seed manufacturing company. Under this Act, the company can make and receive payments, secure credit from banks, and manage trade with suppliers and distributors using legally recognized instruments. The Act provides legal remedies in case of dishonor of cheques or default on payment, ensuring financial security and enforceability of transactions. ## **Annexure IV: Significant Accounting Policies**

### **1. Basis of preparation:**

The summary statement of restated assets and liabilities of the Company as at 30<sup>th</sup> June, 2025, 31<sup>st</sup> March, 2025, 31<sup>st</sup> March 2024 and 31<sup>st</sup> March 2023 and the related summary statement of restated profit and loss and cash flows for the period ended 30<sup>th</sup> June, 2025 and year ended 31<sup>st</sup> March 2025, 31<sup>st</sup> March 2024 and 31<sup>st</sup> March, 2023 (collectively referred to as the “Restated summary financial information”) have been prepared specifically for the purpose of inclusion in the offer document to be filed by the Company in connection with the proposed Initial Public Offering (hereinafter referred to as ‘IPO’).

The restated summary financial information has been prepared by applying necessary adjustments to the financial statements (‘financial statements’) of the Company. The financial statements of the Company have been prepared in accordance with the Generally Accepted Accounting Principles in India (Indian GAAP) to comply with the accounting standards specified under section 133 of the Companies Act, 2013, of the Companies (Accounts) Rules, 2014 and with Companies (Accounting Standards) Rules, 2021 and the relevant provisions of the Companies Act, 2013 (“the 2013 Act”), as applicable and Securities and Exchange Board of India (Issue of Capital and Disclosure Requirements) regulations 2018, as amended (the “Regulations”). The financial statements have been prepared on accrual basis under the historical cost convention. The accounting policies adopted in the preparation of the financial statements are consistently applied.

### **2. Use of Estimates**

The preparation of the financial statements in conformity with Generally Accepted Accounting Principles requires the Management to make estimates and assumptions that affect the reported balances of assets and liabilities and disclosures relating to contingent assets and liabilities as at the date of the financial statements and the reported amounts of income and expenses during the year. Examples of such estimates include provisions for doubtful debts, income taxes, post-sales customer support and the useful lives of Property Plant and equipment and intangible assets.

### **3. Current versus non-current classification:**

The Company presents assets and liabilities in the Balance Sheet based on current/non-current classification.

a) An asset is current when it is:

- Expected to be realized or intended to be sold or consumed in the normal operating cycle,
- Held primarily for the purpose of trading,
- Expected to be realized within twelve months after the reporting period, or
- Cash or cash equivalent unless restricted from being exchanged or used to settle a liability for at least twelve months after the reporting period.

All other assets are classified as non-current.

b) A liability is current when:

- It is expected to be settled in the normal operating cycle,
- It is held primarily for the purpose of trading,
- It is due to be settled within twelve months after the reporting period, or
- There is no unconditional right to defer the settlement of the liability for at least twelve months after the reporting period.

All other liabilities are classified as non-current.

c) Deferred tax assets and liabilities are classified as non-current assets and liabilities.

d) The operating cycle is the time between the acquisition of assets for processing and their realization in cash and cash equivalents.

Based on the nature of products / activities of the Company and the normal time between acquisition of assets and their realization in cash or cash equivalents, the Company has determined its operating cycle as 12 months for the purpose of classification of its assets and liabilities as current and non-current.

**4. Revenue recognition:**

Revenue is recognized to the extent that it is probable that the economic benefits will flow to the Company and the revenue can be reliably measured in accordance with AS-9, Revenue Recognition. Sales are recognized on accrual basis, and only after transfer of goods to the customer.

Revenue is measured at the fair value of the consideration received or receivable where the ownership and significant risk have been transferred to the buyer.

Sales returns are accounted for / provided for in the year in which they pertain to, as ascertained till the finalization of the books of account.

**5. Other Income:**

Other items of income and expenditure are recognized on accrual basis and as a going concern basis, and the accounting policies are consistent with the generally accepted accounting policies.

**6. Property Plant and Equipment and Intangible assets:**

Fixed assets are carried at cost less accumulated depreciation / amortization and impairment losses, if any. The cost of fixed assets comprises its purchase price net of any trade discounts and rebates, any import duties and other taxes (other than those subsequently recoverable from the tax authorities), any directly attributable expenditure on making the asset ready for its intended use, other incidental expenses and interest on borrowings attributable to acquisition of qualifying fixed assets up to the date the asset is ready for its intended use. Depreciation of these assets, on the same basis as other property assets, commences when the assets are ready for their intended use. Spare parts are treated as capital assets when they meet the definition of property, plant and equipment. Otherwise, such items are classified as inventory. Machinery spares which can be used only in connection with an item of fixed asset and whose use is expected to be irregular are capitalized and depreciated over the useful life of the principal item of the relevant assets. If significant parts of an item of property, plant and equipment have different useful lives, then they are accounted for, as separate items (major components) of property, plant and equipment. Any gains or losses on their disposal, determined by comparing sales proceeds with the carrying amount, are recognized in the Statement of Profit or Loss.

Subsequent expenditure on fixed assets after its purchase / completion is capitalized only if such expenditure results in an increase in the future benefits from such asset beyond its previously assessed standard of performance.

An item of property, plant and equipment is de-recognized upon disposal or when no future economic benefits are expected to arise from its use. Any gain or loss arising from its de-recognition is measured as the difference between the net disposal proceeds and the carrying amount of the asset and is recognized in the Statement of Profit and Loss when the asset is de-recognized.

The Company has not revalued its Property, Plant and Equipment.

Intangible assets are carried at cost less accumulated amortization and impairment losses, if any. The cost of an intangible asset comprises its purchase price and any directly attributable expenditure on making the asset ready for its intended use, net of any trade discounts and rebates. Subsequent expenditure on an intangible asset after its purchase is recognized as an expense when incurred unless it is probable that such expenditure will enable the asset to generate future economic benefits over its originally assessed standards of performance and such expenditure can be measured and attributed to the asset reliably, in which case such expenditure is added to the cost of the asset.

**7. Depreciation & Amortization:**

The Company has applied the estimated useful lives as specified in Schedule II of the Companies Act 2013 and calculated the depreciation as per the Written Down Value Method. Depreciation on new assets acquired during the year is provided at the rates applicable from the date of acquisition to the end of the financial year. In respect of the assets sold during the year, depreciation is provided from the beginning of the year till the date of its disposal.

Intangible assets are amortized on a straight-line basis over the estimated useful life as specified in Schedule II of the Companies Act 2013. The amortization expense on intangible assets with finite lives is recognized in the

statement of profit and loss. In respect of the assets sold during the year, amortization is provided from the beginning of the year till the date of its disposal.

**The estimated useful lives of assets are as follows:**

Category	Useful life
Computer & Laptop	3 years
Furniture & Fittings	10 years
Office Equipment	10 years
Plant & Machinery	20 years
Building	30 years

**8. Impairment of assets:**

The Management periodically assesses using, external and internal sources, whether there is an indication that an asset may be impaired. An impairment loss is recognised wherever the carrying value of an asset exceeds its recoverable amount. The recoverable amount is higher of the asset's net selling price and value in use, which means the present value of future cash flows expected to arise from the continuing use of the asset and its eventual disposal. The carrying values of assets are reviewed at each reporting date to determine if there is indication of any impairment. If any indication exists, the assets recoverable amount is estimated. For assets that are not yet available for use, the recoverable amount is estimated at each reporting date. An impairment loss is recognized whenever the carrying amount of an asset or its cash-generating unit exceeds its recoverable amount. Impairment losses are recognized in the Statement of Profit and Loss. An impairment loss is reversed if there has been a change in the estimates used to determine the recoverable amount. An impairment loss is reversed only to the extent that the asset's carrying amount does not exceed the carrying amount that would have been determined net of depreciation or amortization, if no impairment loss had been recognized.

**9. Taxes on Income:**

Income Tax expense is accounted for in accordance with AS-22 "Accounting for Taxes on Income" for both Current Tax and Deferred Tax stated below:

**A. Current Tax:**

Provision for current tax is made in accordance with the provisions of the Income Tax Act, 1961.

**B. Deferred Tax:**

Deferred tax is recognised, subject to the consideration of prudence, as the tax effect of timing difference between the taxable income and accounting income computed for the current accounting year using the tax rates and tax laws that have been enacted or substantially enacted by the balance sheet date.

Deferred tax assets are recognised and carried forward to the extent that there is a reasonable certainty, except arising from unabsorbed depreciation and carried forward losses, that sufficient future taxable income will be available against which such deferred tax assets can be realised. However, if there are unabsorbed depreciation and carry forward of losses and items relating to capital losses, deferred tax assets are recognized only if there is virtual certainty supported by convincing evidence that there will be sufficient future taxable income available to realize the assets. Deferred tax assets and liabilities are offset if such items relate to taxes on income levied by the same governing tax laws and the Company has a legally enforceable right for such set off.

Deferred tax assets are reviewed at each balance sheet date for their realisability.

**10. Provisions and Contingent Liabilities:**

A provision is recognised if, as a result of past event, the Company has a present legal obligation that can be estimated reliably and it is probable that an outflow of economic benefit will be required to settle the obligation. Provisions are determined by the best estimate of outflow of economic benefits required to settle the obligation at the reporting date. Where no reliable estimate can be made, a disclosure is made as contingent liability. A disclosure for a contingent liability is also made when there is a possible obligation or a present obligation that may, but probably will not, require an outflow of resources. Where there is possible obligation or present

obligation in respect of which the likelihood of outflow of resources is remote, no provision or disclosure is made. The Company does not recognize assets which are of contingent nature. However, if it has become virtually certain that an inflow of economic benefits will arise, the asset and related income are recognized in the financial statements of the period in which the change occurs.

#### **11. Earnings Per Share:**

Basic Earnings per share is computed by dividing the net profit after tax by the weighted average number of equity shares outstanding during the period. The weighted number of equity shares outstanding during the period is adjusted for events that have changed the number of equity shares outstanding, without a corresponding change in resources. Diluted earnings per share is computed by dividing the net profit after tax by the weighted average number of shares considered for deriving basic earnings per share and also the weighted average number of equity shares that could have been issued upon conversion of all dilutive potential equity shares. The diluted potential equity shares are adjusted for the proceeds receivable had the shares been actually issued at fair value which is the average market value of the outstanding shares. Dilutive potential equity shares are deemed converted as at the beginning of the period, unless issued at a later date. Dilutive potential equity shares are determined independently for each period presented. Diluted earnings per share are computed using the weighted average number of equity and dilutive potential equity shares outstanding during the year, except where the results would be anti-dilutive.

#### **12. Operating Leases**

Lease where the Lessor effectively retains substantially all the risks and benefits of ownership of the leased term, are classified as operating lease. Operating lease payments are recognized as an expense in the Profit and Loss Account on a straight-line basis.

#### **13. Cash and Cash Equivalents:**

Cash and cash equivalents comprise cash and cash deposits with banks. The Company considers all highly liquid investments with an original maturity at a date of purchase of three months or less and that are readily convertible to known amounts of cash to be cash equivalents. Other deposits with bank represent investments with an original maturity at a date of purchase between 3 months and 12 months. Further, Cash equivalents also include other Bank Balances with maturity of more than 12 months.

#### **14. Cash flow statement**

Cash flows are reported using the indirect method, whereby profit / (loss) before extraordinary items and tax is adjusted for the effects of transactions of non-cash nature and any deferrals or accruals of past or future cash receipts or payments. The cash flows from operating, investing and financing activities of the Company are segregated based on the available information.

#### **15. Foreign Currency Transactions**

In preparing financial statements of the company, transactions in currencies other than the functional currency are recorded at the rate of exchange Prevailing on the date of transaction. At the end of each reporting period, monetary items denominated in foreign currencies are retranslated at the rates prevailing at the end of reporting period. Non-monetary items carried at fair value that are denominated in foreign currencies are retranslated at the rates prevailing on the date when the fair value was determined. Exchange differences arising on the settlement of monetary items, and on retranslation of monetary items are included in the statement of profit and loss for the period Exchange differences arising on retranslation on non-monetary items carried at fair value are included in statement of profit and loss for the period except for differences arising on the retranslation of non-monetary items in respect of which gains and losses are recognised directly in other comprehensive income.

#### **16. Inventories**

Stock of Raw Materials, components and other stocks are valued at Cost (FIFO Basis) (net off CENVAT & GST wherever applicable) Finished products including traded goods and work-in-process are valued at lower of cost or net realizable value. Net realizable value is the estimated selling price in the ordinary course of business, less estimated costs of completion and estimated costs necessary to make the sale.

## **17. Borrowing Cost**

General and Specific Borrowing costs directly attributable to the acquisition, construction or production of qualifying assets, which are assets that necessarily take Substantial period of time to get ready for their intended for use are added to the cost of those assets. All other borrowing costs are recognized as an expense in Statement of Profit and Loss in the period in which they are incurred. Other income earned on the temporary investment of specific borrowing pending their expenditure on qualifying assets is deducted from the borrowing costs eligible for capitalisation.

## **18. Segment Information**

Based on the principles for determination of segments given in Accounting Standard 17 “Segment Reporting” notified by Companies (Accounting Standard) Rules, 2021 and as amended from time to time, the company is mainly engaged in the activity surrounded with main business of the Company hence there is no reportable segment.

## **19. Prior Period Expenditure**

The change in estimate due to error or omission in earlier period is treated as prior period items. The items in respect of which liability has arisen/crystallized in the current year, though pertaining to earlier year is not treated as prior period expenditure.

## **20. Extra Ordinary Items**

The income or expenses that arise from event or transactions which are clearly distinct from the ordinary activities of the Company and are not recurring in nature are treated as extra ordinary items. The extra ordinary items are disclosed in the statement of profit and loss as a part of net profit or loss for the period in a manner so as the impact of the same on current profit can be perceived.

## **21. Other Accounting Policies**

Other Accounting Policies which are not covered here in above are consistent with generally accepted accounting principles applicable in India.

### BUSINESS OVERVIEW

Our Company is engaged in the business of seed manufacturing, which includes the development, multiplication, processing, and supply of seeds for a variety of field crops and vegetables. The seed production process is carried out in a structured manner across multiple stages and involves the use of improved genetic seed material procured from recognised sources. Such seed material is multiplied, processed, conditioned, and handled in accordance with prescribed agronomic and processing practices to produce seeds suitable for agricultural use, including seeds supplied to farmers for crop cultivation.

The Company procures genetic seed material, including breeder and other suitable seed material, from recognised agricultural institutions, government-supported research organizations and open market. In addition, seed production is undertaken through arrangements with identified seed-growing farmers, wherein agricultural land owned by such farmers is utilised for cultivation. Under these arrangements, the Company supplies the requisite seed material and provides technical guidelines and cultivation protocols. The farmers carry out sowing and related agricultural operations in accordance with the Company's instructions, while the Company's field staff and agronomists monitor and supervise the crop to maintain quality standards. Although the ownership of agricultural land remains with the farmers, seed production undertaken through contractual arrangements is carried out in accordance with the Company's prescribed guidelines and supervision, and all subsequent processing, quality control, and commercial activities relating to such seeds are undertaken by the Company.

Post-harvest, the cultivated seeds are transported to the Company's processing facility, where they undergo a series of controlled operations, including mechanical cleaning to remove inert matter and impurities, precision grading to ensure uniformity, and seed treatment to enhance storability and protect against pests and diseases. Thereafter, the processed seeds are systematically packed using appropriate packaging standards to preserve quality, viability, and genetic characteristics prior to storage and distribution. The Company's seed processing unit is located at Jashapar, Kalavad, in Jamnagar District and is equipped with modern infrastructure spread across an area of over 10,218 square feet.

Our Company presently works with a limited number of contract seed-growing farmers under formal arrangements. However, our Company is not dependent exclusively on such contract farmers for seed availability. In cases of operational requirements, crop-specific demand, or supply constraints, the Company also procures seeds directly from farmers and the open market. Such procured seeds are thereafter subjected to sorting, cleaning, grading, processing, quality checks, labelling, and packing at the Company's processing facility before being sold in the market.

Our team comprises experienced agronomists, field staff, and technicians who ensure adherence to quality standards, support productivity improvements, and implement sustainable agricultural practices. Over time, our Company has established strong working relationships with the farming community and continues to follow an integrated approach that includes sourcing, production, quality control, and supply of seeds. Our seeds are sold under the brand name “**Dhanwel Seeds**”. Our Company is ISO 9001:2015 certified and is committed to maintaining consistent seed quality and supporting the agricultural sector with reliable seed solutions.

#### **PHASED IMPLEMENTATION OF UPI FOR BIDS BY INDIVIDUAL BIDDERS, WHO APPLIES FOR MINIMUM APPLICATION SIZE, AS PER THE UPI CIRCULAR**

SEBI has issued circular bearing number SEBI/HO/CFD/DIL2/CIR/P/2018/138 dated November 1, 2018, circular no. SEBI/HO/CFD/DIL2/CIR/P/2019/50 dated April 3, 2019, circular no. SEBI/HO/CFD/DIL2/CIR/P/2019/76 dated June 28, 2019, circular no. SEBI/HO/CFD/DIL2/CIR/P/2019/85 dated July 26, 2019, circular no. SEBI/HO/CFD/DCR2/CIR/P/2019/133 dated November 08, 2019 and circular SEBI/HO/CFD/DIL2/CIR/P/2020/50 dated March 30, 2020 (collectively the “UPI Circulars”) in relation to streamlining the process of public Issue of equity shares and convertibles. Pursuant to the UPI Circulars, the UPI Mechanism has been introduced in a phased manner as a payment mechanism (in addition to mechanism of blocking funds in the account maintained with SCSBs under the ASBA) for applications by RIBs through intermediaries with the objective to reduce the time duration from public Issue closure to listing from six working days to up to three working days. Considering the time required for making necessary changes to the systems and to ensure complete and smooth transition to the UPI payment mechanism, the UPI Circular proposes to introduce and implement the UPI payment mechanism in three phases in the following manner:

**Phase I:** This phase was applicable from January 1, 2019 until March 31, 2019, or floating of five main board public issues, whichever is later. Subsequently, the timeline for implementation of Phase I was extended till June 30, 2019. Under this phase, a Individual Investor had the option to submit the Application Form with any of the Designated Intermediary and use his / her UPI ID for the purpose of blocking of funds. The time duration from public Issue closure to listing continued to be six working days.

**Phase II:** This phase has become applicable from July 1, 2019 and was to initially continued for a period of three months or floating of five main board public issues, whichever is later. Subsequently, it was decided to extend the timeline for implementation of Phase II until March 31, 2020. Further, as per SEBI circular SEBI/HO/CFD/DIL2/CIR/P/2020/50 dated March 30, 2020, the current Phase II of Unified Payments Interface with Application Supported by Blocked Amount is continued till further notice. Under this phase, submission of the ASBA Form by RIBs through Designated Intermediaries (other than SCSBs) to SCSBs for blocking of funds will be discontinued and will be replaced by the UPI payment mechanism. However, the time duration from public Issue closure to listing continues to be six working days during this phase.

**Phase III:** This phase has become applicable on a voluntary basis for all issues opening on or after September 1, 2023, and on a mandatory basis for all issues opening on or after December 1, 2023, vide SEBI circular bearing number SEBI/HO/CFD/TPD1/CIR/P/2023/140 dated August 9, 2023 (“T+3 Notification”). In this phase, the time duration from public Issue closure to listing has been reduced to three Working Days. The Issue shall be undertaken pursuant to the processes and procedures as notified in the T+3 Notification as applicable, subject to any circulars, clarification or notification issued by the SEBI from time to time, including any circular, clarification or notification which may be issued by SEBI.

The Issue is being made under Phase III of the UPI (on a mandatory basis).

All SCSBs offering facility of making application in public issues shall also provide facility to make application using the UPI Mechanism. The Issuers will be required to appoint one of the SCSBs as a sponsor bank to act as a conduit between the Stock Exchanges and NPCI in order to facilitate collection of requests and / or payment instructions of the Individual Applicants into the UPI payment mechanism.

*For further details, refer to the General Information Document available on the websites of the Stock Exchanges and the Book Running Lead Manager.*

Pursuant to the SEBI UPI Circular, SEBI has set out specific requirements for redressal of investor grievances for applications that have been made through the UPI Mechanism. The requirements of the SEBI UPI Circular include, appointment of a nodal officer by the SCSB and submission of their details to SEBI, the requirement for SCSBs to send SMS alerts for the blocking and unblocking of UPI mandates, the requirement for the Registrar to submit details of cancelled, withdrawn or deleted applications, and the requirement for the bank accounts of unsuccessful Bidders to be unblocked not later than one day from the date on which the Basis of Allotment is finalised. Failure to unblock the accounts within the timeline would result in the SCSBs being penalised under the relevant securities law. Additionally, if there is any delay in the redressal of investors’ complaints in this regard, the relevant SCSB as well as the post – Issue Book Running Lead Manager will be required to compensate the concerned investor.

All SCSBs offering facility of making application in public issues shall also provide facility to make application using the UPI Mechanism. The Issuers will be required to appoint one of the SCSBs as a sponsor bank to act as a conduit between the Stock Exchanges and NPCI in order to facilitate collection of requests and / or payment instructions of the Individual Applicants into the UPI payment mechanism.

The processing fees for applications made by UPI Bidders using the UPI Mechanism may be released to the remitter banks (SCSBs) only after such banks make an application as prescribed in Annexure I of SEBI circular no. SEBI/HO/CFD/DIL2/CIR/P/2022/51 dated April 20, 2022 and provide a written confirmation on compliance with SEBI circular no. The government bodies responsible for granting foreign investment approvals are the Reserve Bank of India (“RBI”) and Department of Industrial Policy and Promotion (“DIPP”), Ministry of Commerce and Industry, Government of India.

The Government of India has from time to time made policy pronouncements on FDI through press notes and press releases. The Government of India proposes to update the consolidated circular on FDI Policy once every year and therefore, the FDI Policy will be valid until the DPIIT issues an updated circular.

The RBI also issues Master Circular on Foreign Investment in India every year. Presently, FDI in India is being governed by Master Circular on Foreign Investment dated July 01, 2015, as updated from time to time by RBI and Master Direction–Foreign Investment in India (updated up to March 08, 2019).
